THE FUSION LINE

WHERE PERFORMANCE MEETS COMFORT

The lines between **performance and comfort** are blurring—**there is a new fusion**. With the excitement of the world opening again we want to look our best but having been in sweatpants or leggings for more than a year, **tolerance for discomfort is low**.

Meet the Fusion Line from Chargeurs*PCC. As a leader in inner component solutions for some of the most demanding performance brands in the world, we have deep knowledge of these technical products and the wide range of benefits they can bring.

The Fusion Line introduces these **high-tech performance materials** to new categories like suiting and dresses, where you can keep the traditional **aesthetic** while bringing **unprecedented comfort to the wearer**.

Be endlessly creative in your design with these new materials, which can give even the most tailored suit the ease of a track suit.

Suiting & Dresses

Men's Suiting & Shirting

Shirt

Comfort Collar

Add comfort to collars. This product allows for comfort on the collar band with any shirting that has stretch properties. Two-way stretch interlinings add comfort to collars in performance shirting. Comfort Collar two-way stretch interlinings are available in a variety of qualities so you can dial-in hand feel and weights.

Gripper

Keep shirts perfectly tucked. Gripper used on shirting material keeps the shirt strategically tucked in place. Can be used on the outside and/or inside of the material. Also great under the collar to keep ties from sliding.

Non-Iron / Wrinkle Free

Stay wrinkle free. Our interlining developed specifically for non-iron and wrinkle-free shirting allows the garment to survive the harsh process of dipping and baking without losing material integrity. This product is applicable for both pre-and post-cure treatment.

Unstructured Suit Jacket

Lightweight Washable Canvas

Tailored look in an unstructured or knit jacket. Maintain a clean, tailored look even in an unstructured jacket or a jacket with stretch fabric. Our Lightweight Washable Canvas provides form to a jacket while remaining lightweight and washable for today's knit suiting styles that allow for comfort and range of motion.

Stretch Interlining

Allows stretch and movement in jackets. We offer a large range of two-way or four-way stretch Interlinings for lapel, facing, and front. Allows for stretch and movement, increases range of motion and ease, and eliminates differentials.

Bonding Tape

Create a seamless, low-profile look. Our bonding tapes can be used in place of or over seam stitching for a non-sew aesthetic or to add weather resistance to seams. Reduces the bulk of stitching.

Suit Trousers

Stretch Waistband

Add comfort, ease, and perfect fit. Achieve the look of a fully tailored suit trouser with ease of a sweatpant. With our stretch waistbands there is no need to size up or build in pleats or gathers so you can maintain original suiting proportions while adding comfort and perfect fit.

Bonded Hem

Sleek, low-profile hem. Our Bonded Hem product stabilizes hems while providing a clean, low-profile look.

Antimicrobial Lining

Protect against odor, degradation, and stains with antimicrobial lining. The warm and often moist environment next to the skin can lead to the growth of microorganisms, which can multiply on fabrics and result in odors, discoloration, staining, and fabric deterioration. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Suiting & Dresses

Women's Tailored

Shirt

Non-Iron / Wrinkle Free

Stay wrinkle free. Our interlining developed specifically for non-iron and wrinkle-free shirting allows the garment to survive the harsh process of dipping and baking without losing material integrity. This product is applicable for both pre-and post-cure treatment.

Sweater

Elastic Tape

Maintain original shape. Our thin and light Elastic Tapes are made of high-grade pure TPU, a skin friendly and environmentally safe material that can decompose naturally. The elastic property of our tapes allows fabric to stretch yet fully recover to maintain its original shape through wear and wash. These tapes stabilize and maintain the inherent characteristics of collars, floating pockets, plackets, fashioning, and arm eyes without drooping or sagging.

Specialty Webs

Keep notions in place. Our Specialty Webs act as targeted anchors for directly applied notions onto sweater knits. Reinforces stitching and prohibits drooping.

Unstructured Suit Jacket

Lightweight Washable Canvas

Tailored look in an unstructured or knit jacket. Maintain a clean, tailored look even in an unstructured jacket or a jacket with stretch fabric. Our Lightweight Washable Canvas provides form to a jacket while remaining lightweight and washable for today's knit suiting styles that allow for comfort and range of motion.

Stretch Interlining

Allows stretch and movement in jackets. We offer a large range of two-way or four-way stretch Interlinings for lapel, facing, and front. Allows for stretch and movement, increases range of motion and ease, and eliminates differentials.

Bonding Tape

Create a seamless, low-profile look. Our bonding tapes can be used in place of or over seam stitching for a non-sew aesthetic or to add weather resistance to seams. Reduces the bulk of stitching.

Women's Trousers

Stretch Waistband

Add comfort, ease, and perfect fit. Achieve the look of a fully tailored suit trouser with ease of a sweatpant. With our stretch waistbands there is no need to size up or build in pleats or gathers so you can maintain original suiting proportions while adding comfort and perfect fit.

Bonded Hem

Sleek, low-profile hem. Our Bonded Hem product stabilizes hems while providing a clean, low-profile look.

Bonding Tapes

Invisible shaping and control. Our Bonding Tapes can be used to provide hidden tummy support and control with no embarkation lines. These tapes have high bond strength and stretch and recovery properties. Designed for comfort even with extended wear.

Suiting & Dresses Strapless Gown

Stretch Interlining

Add drape qualities to gowns.
Use Stretch Fusible products to give support to drape qualities. Designed to move with the fabric, our fusible Stretch Interlinings provide needed support for critical areas while retaining a soft hand, providing excellent drape, and allowing freedom of movement.

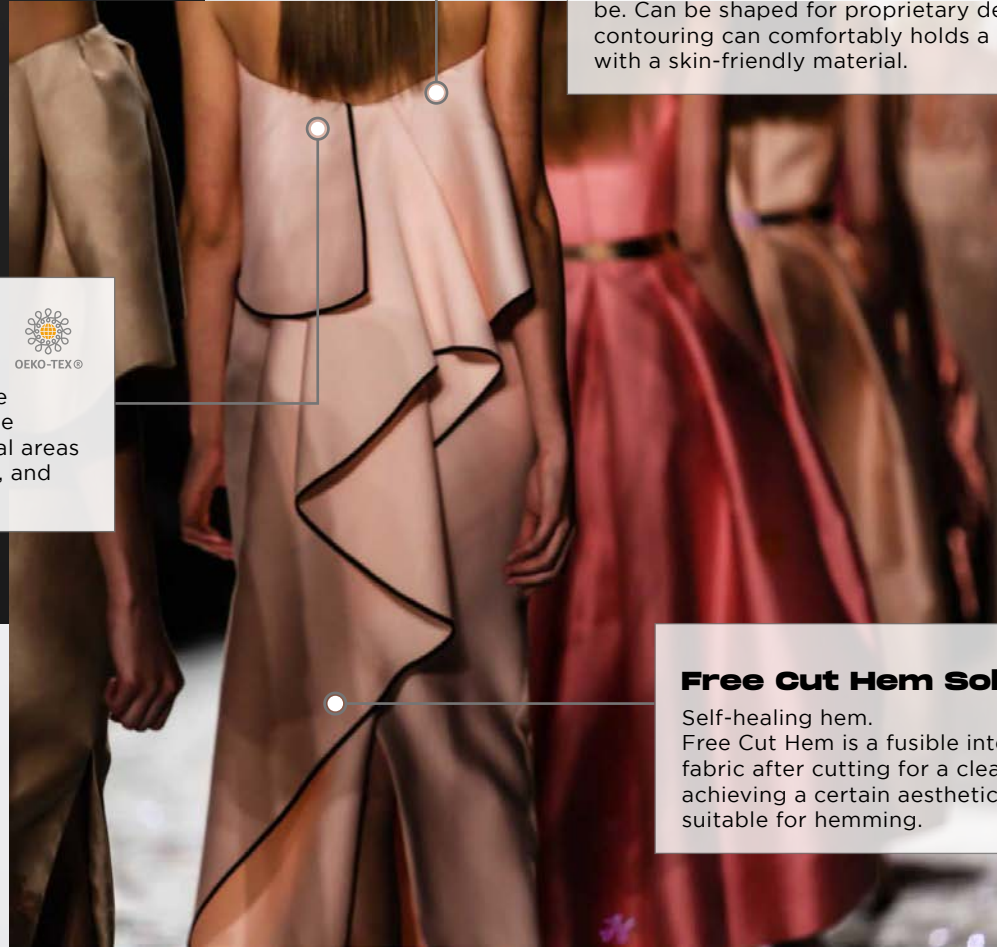

Gripper

Keep strapless gowns in place.
Our gripper can be strategically placed to keep strapless bodices exactly where they were designed to be. Can be shaped for proprietary design and contouring can comfortably holds a gown to the body with a skin-friendly material.

Free Cut Hem Solution

Self-healing hem.
Free Cut Hem is a fusible interlining that heals the fabric after cutting for a clean edge. Great for achieving a certain aesthetic with gown fabrics not suitable for hemming.

Suiting & Dresses

Dresses

Invisible Adhesion

Lightweight, breathable adhesion of fabrics, no matter how open. Invisible adhesion offers a bonding solution for lace or open-weave fabrics that provides superior comfort, preserving the breathability, stretch, recovery, and softness of bonded areas. Dots of adhesive are transferred to the lace open weave to provide an invisible bond when married with another fabric.

OEKO-TEX®

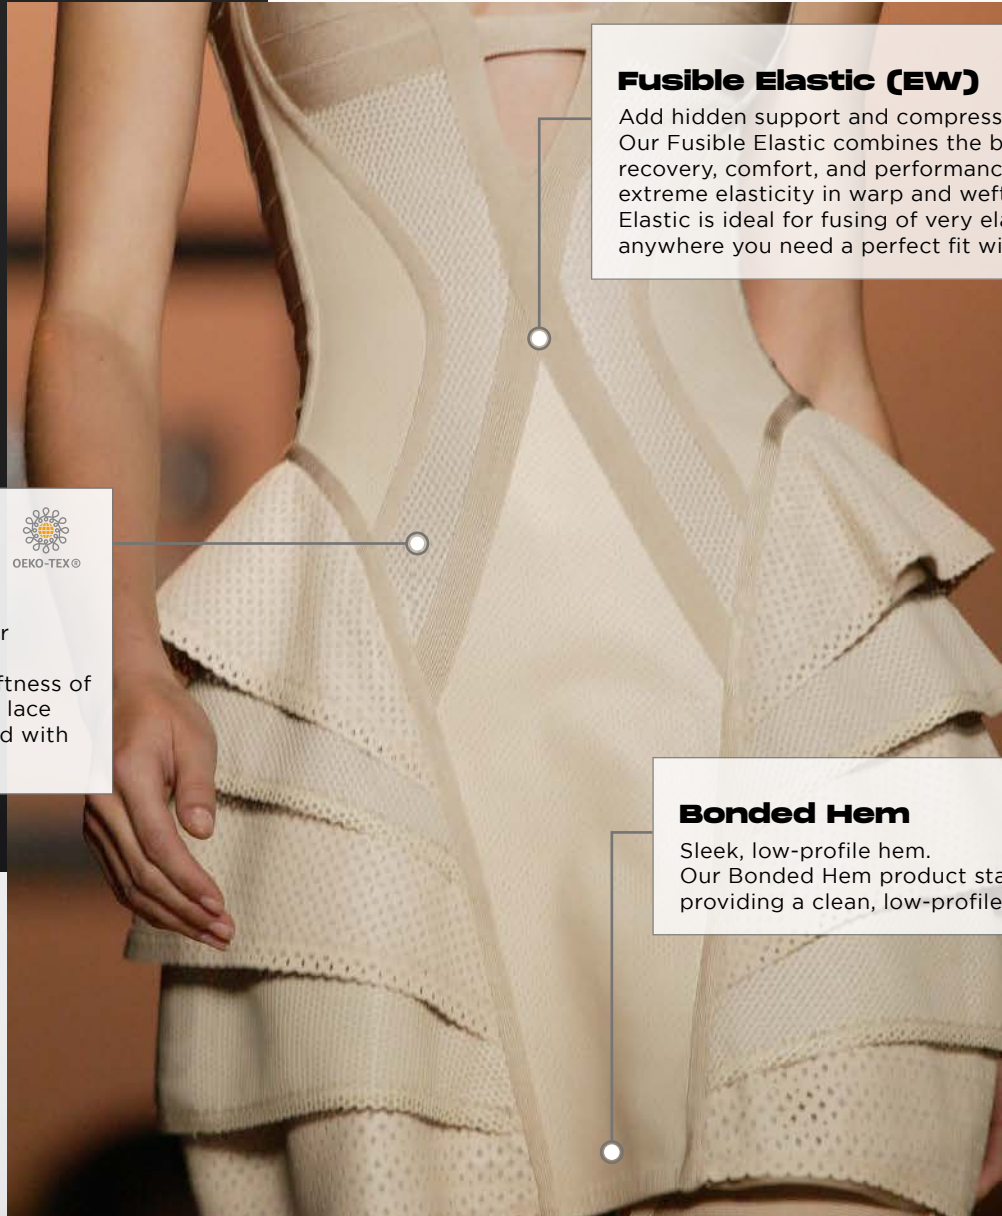

Fusible Elastic (EW)

Add hidden support and compression. Our Fusible Elastic combines the benefits of stretch, recovery, comfort, and performance. Because of its extreme elasticity in warp and weft directions, Fusible Elastic is ideal for fusing of very elastic outer fabrics anywhere you need a perfect fit with long-lasting comfort.

Bonded Hem

Sleek, low-profile hem. Our Bonded Hem product stabilizes hems while providing a clean, low-profile look.

Suiting & Dresses

Women's Separates

Handbags

Stretch Binding Tape

Use decorative stretch binding tapes inside of handbags for a clean look.

Our Stretch Binding Tapes are non-bias stretch bindings developed to perform under extreme conditions yet retain stretch and color characteristics. Laser cut to required size providing a fray-free binding for ease of application and superior finish quality.

Antimicrobial Lining

Keep the inside of handbags clean from microbes. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Fusible Buckram

For customizable structure.

Our fusible Buckram provides shape and structure to the bottom of handbags, adding durability and longevity. This is offered in various weight and hand feel and is also available with Lainiere Performance Silver for antimicrobial protection.

Elastic Tape

Elastic Tape

Maintain shape and integrity of style lines.

Use our elastic to tape maintain shape and integrity of style lines on vertical rise, cuff joints, and inset paneling. Our thin and light Elastic Tapes are made of high-grade pure TPU, a skin friendly and environmentally safe material that can decompose naturally. The elastic property of our tapes allows fabric to stretch yet fully recover to maintain its original shape through wear and wash.

Women's Trousers

Stretch Waistband

Add comfort, ease, and perfect fit.

Achieve the look of a fully tailored suit trouser with ease of a sweatpant. With our stretch waistbands there is no need to size up or build in pleats or gathers so you can maintain original suiting proportions while adding comfort and perfect fit.

Bonded Hem

Sleek, low-profile hem.

Our Bonded Hem product stabilizes hems while providing a clean, low-profile look.

Bonding Tapes

Invisible shaping and control.

Our Bonding Tapes can be used to provide hidden tummy support and control with no embarkation lines. These tapes have high bond strength and stretch and recovery properties. Designed for comfort even with extended wear.

Antimicrobial Lining

Protect against odor, degradation, and stains with antimicrobial lining. The warm and often moist environment next to the skin can lead to the growth of microorganisms, which can multiply on fabrics and result in odors, discoloration, staining, and fabric deterioration. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Athleisure and Casual

Shirt

Comfort Collar

Add comfort to collars. This product allows for comfort on the collar band with any shirting that has stretch properties. Two-way stretch interlinings add comfort to collars in performance shirting. Comfort Collar two-way stretch interlinings are available in a variety of qualities so you can dial-in hand feel and weights.

Gripper

Keep shirts perfectly tucked. Gripper used on shirting material keeps the shirt strategically tucked in place. Can be used on the outside and/or inside of the material. Also great under the collar to keep ties from sliding.

Non-Iron / Wrinkle Free

Stay wrinkle free. Our interlining developed specifically for non-iron and wrinkle-free shirting allows the garment to survive the harsh process of dipping and baking without losing material integrity. This product is applicable for both pre-and post-cure treatment.

Sweater

Elastic Tape

Maintain original shape. Our thin and light Elastic Tapes are made of high-grade pure TPU, a skin friendly and environmentally safe material that can decompose naturally. The elastic property of our tapes allows fabric to stretch yet fully recover to maintain its original shape through wear and wash. These tapes stabilize and maintain the inherent characteristics of collars, floating pockets, plackets, fashioning, and arm eyes without drooping or sagging.

Specialty Webs

Keep notions in place. Our Specialty Webs act as targeted anchors for directly applied notions onto sweater knits. Reinforces stitching and prohibits drooping.

Woven Bottoms

Fusible Elastic (with or without a drawcord)

Get a clean look with an elastic waist. Use our Fusible Elastic with or without a drawcord to achieve a lower profile than standard knitted elastic. Adds comfort and perfect fit without bulk.

Bonded Hem

Sleek, low-profile hem. Our Bonded Hem product stabilizes hems while providing a clean, low-profile look.

Athleisure and Casual

Jacket

Antimicrobial Lining

Protect against odor, degradation, and stains with antimicrobial lining.

The warm and often moist environment next to the skin can lead to the growth of microorganisms, which can multiply on fabrics and result in odors, discoloration, staining, and fabric deterioration. Lainiere Performance Silver uses positively charged silver ions permanently embedded.

T-Shirt

Invisible Adhesion

Maintain collar shape.
Maintain original shape of ribbed collar by injecting modulus with our invisible adhesion solutions.

Elastic Tape

Maintain original shape of T-Shirts.
Our thin and light Elastic Tapes are made of high-grade pure TPU, a skin friendly and environmentally safe material that can decompose naturally. The elastic property of our tapes allows fabric to stretch yet fully recover to maintain its original shape through wear and wash. These tapes stabilize and maintain the inherent characteristics of collars, floating pockets, plackets, fashioning, and arm eyes without drooping or sagging.

Denim

High-Wash PX

Interlining that can survive distressing.
Our washable High-Stretch Interlining is made specifically for denim. It provides dynamic stretchability in all directions without distortion and has anti-pilling qualities. This product retains its properties to perfectly support fabric even through heavy wash, bleaching, and/or garment dyeing.

Athleisure and Casual

Backpack

Abra-Stop®

Add tough, anti-abrasion characteristics. Abra-Stop® anti-abrasion fabric is ideal for use in high-abrasion areas on garments. This patented product is made from a technical polyester-cotton fabric with much better characteristics than the high-tenacity polyamide fabric generally used for knees, elbows, and pocket reinforcement. Though Abra-Stop is incredibly tough, it does not require any special equipment in the manufacturing process.

Antimicrobial Lining

Keep the inside of backpack clean and odor-free. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Cap

Stretch Inner Crown

Lightweight breathable caps. Our tricot and circular knit buckram adds stretch, volume, and breathability to caps for long-lasting comfort.

Antimicrobial Sweatband

The sweatband of a cap is the perfect place for microbes to live and grow, which can result in odors, discoloration, staining, and fabric deterioration. Our Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Woven Bottoms

Fusible Elastic

Get a clean look with an elastic waist. Use our Fusible Elastic with or without a drawcord to achieve a lower profile than standard knitted elastic. Adds comfort and perfect fit without bulk.

Bonded Hem

Sleek, low-profile hem. Our Bonded Hem product stabilizes hems while providing a clean, low-profile look.

Athleisure and Casual

Denim

Bonding Tape

Invisible shaping and control. Our Bonding Tapes can be used to provide hidden tummy support and control with no embarkation lines. These tapes have high bond strength and stretch and recovery properties. Designed for comfort even with extended wear.

High-Wash PX

Interlining that can survive distressing. Our washable High-Stretch Interlining is made specifically for denim. It provides dynamic stretchability in all directions without distortion and has anti-pilling qualities. This product retains its properties to perfectly support fabric even through heavy wash, bleaching, and/or garment dyeing.

Women's Jacket

Lightweight Washable Canvas

Tailored look in an unstructured or knit jacket. Maintain a clean, tailored look even in an unstructured jacket or a jacket with stretch fabric. Our Lightweight Washable Canvas provides form to a jacket while remaining lightweight and washable for today's knit suiting styles that allow for comfort and range of motion.

Stretch Interlining

Allows stretch and movement in jackets. We offer a large range of two-way or four-way stretch Interlinings for lapel, facing, and front. Allows for stretch and movement, increases range of motion and ease, and eliminates differentials.

Bra

Bonding Tapes

Create a seamless, low-profile look. Our bonding tapes can be used in place of or over seam stitching for a non-sew aesthetic or to add weather resistance to seams. Reduces the bulk of stitching.

Athleisure and Casual Light Waterproof Jacket

Bonding Tape

Adds weather protection to zippers. Our Bonding Tapes offer a non-sew solution to weatherizing zippers. Apply over zipper placket for better protection.

Overlay Tapes

Express your brand. Our Overlay Tapes are the perfect complement of performance and fashion. Designed for ease of application and available in custom fashion elements for use as laser cut logos or design elements, as cuff/collar/zipper trim, and over bonded seams to eliminate fraying.

Seam Sealing Tape

Seal Seams to keep out the weather. Stitching poses an issue when it comes to water tightness. Our Seam Sealing Tapes are precision adhesive films applied to sewn seams to increase water repellency where required. These tapes are a fast and easy way to seam seal all kinds of products and are designed for application on a wide variety of fabrics.

Athleisure and Casual Leggings & Sports Bra

Comfort Stretch Nonwoven

Add support and control. Our Comfort Stretch Nonwoven waistband provides variable support & control and stops rolling. Pairs to the outer fabric directly, complementing the fabric with a seamless integration. Helps the leggings stay in place and look sharp.

Gripper

Keep the hem in place. Gripper used at the hem of leggings keeps them in place throughout even through rigorous movement.

Fusible Elastic (with or without a drawcord)

Get a clean look with an elastic waist. Use our fusible elastic with or without a drawcord to achieve a lower profile than standard knitted elastic. Adds comfort and perfect fit without bulk.

Sports & Outdoor

Running/Training Leggings

Gripper

Keep the hem in place.
Gripper used at the hem of leggings keeps them in place throughout even through rigorous movement.

Comfort Stretch Nonwoven

Add support and control.

Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Pant

Stretch Waistband

Add comfort, ease, and perfect fit.

With our stretch waistbands, there is no need to size up to add comfort to workwear. Adds ease and performance for increased mobility and range of motion.

Sports & Outdoor

Denim Jacket

High-Wash PX

Interlining that can survive distressing. Our washable High-Stretch Interlining is made specifically for denim. It provides dynamic stretchability in all directions without distortion and has anti-pilling qualities. This product retains its properties to perfectly support fabric even through heavy wash, bleaching, and/or garment dyeing.

OEKO-TEX®

Puffer Jacket

Down Proof Liner

Enhance the life and look of down or fiberfill garments.

Our down-proof liners are designed to prevent feathers and fibers from migrating outwards through shell fabrics and seams. Keeps wearers comfortable and the down from spilling out while remaining soft and flexible enough to allow for natural movement.

OEKO-TEX®

Insulation / Wadding

High-quality sustainable wadding. Our sustainable Eco-Fiberfill product is of the highest quality, uses certified recycled fibers, and provides high TOG thermal retention values. The soft hand allows for flexibility of use across multiple garment applications.

SUSTAINABLE
360

OEKO-TEX®

Corporate Uniform & Workwear

Shirt

Comfort Collar

Add comfort to collars. This product allows for comfort on the collar band with any shirting that has stretch properties. Two-way stretch interlinings add comfort to collars in performance shirting. Comfort Collar two-way stretch interlinings are available in a variety of qualities so you can dial in-hand feel and weights.

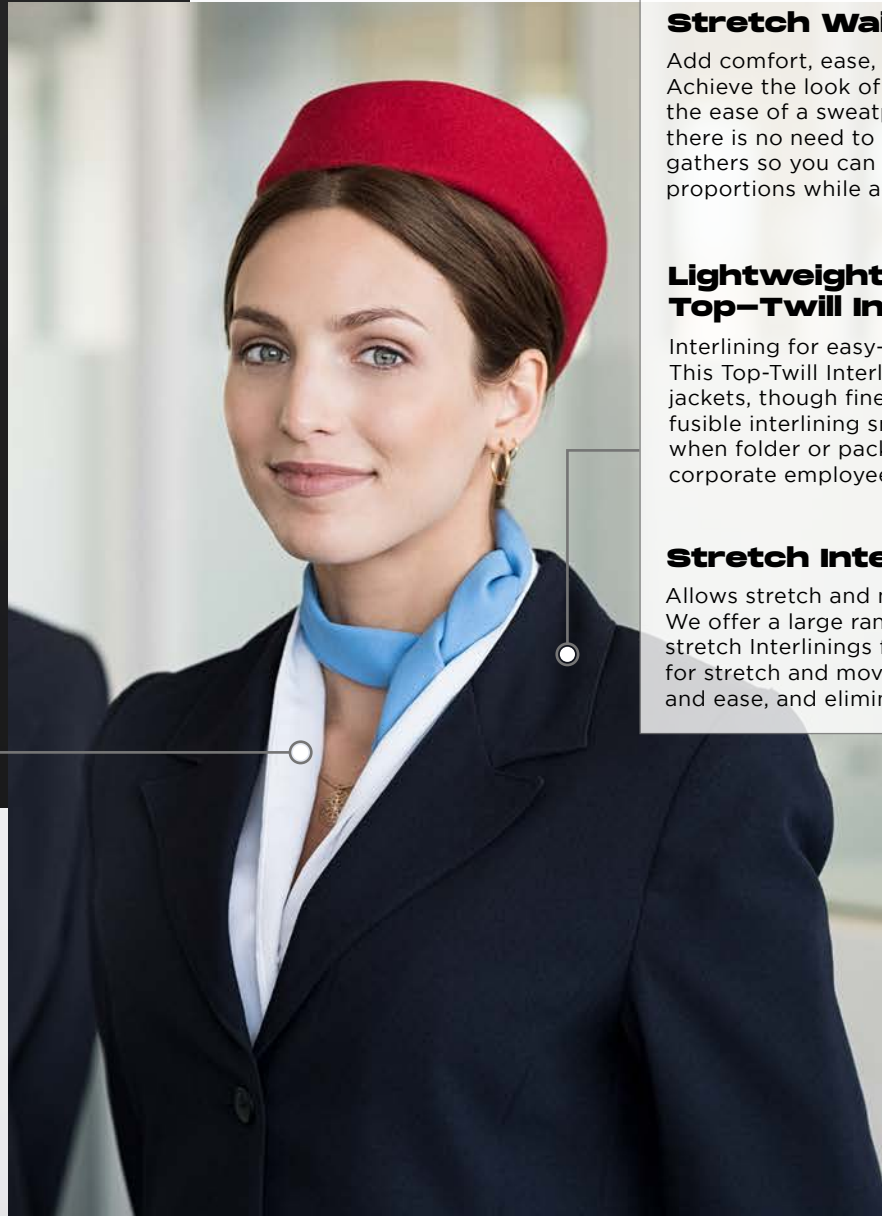

Gripper

Keep shirts perfectly tucked. Gripper used on shirting material keeps the shirt strategically tucked in place. Can be used on the outside and/or inside of the material. Also great under the collar to keep ties from sliding.

Non-Iron / Wrinkle Free

Stay wrinkle free. Our interlining developed specifically for non-iron and wrinkle-free shirting allows the garment to survive the harsh process of dipping and baking without losing material integrity. This product is applicable for both pre-and post-cure treatment.

Suiting

Stretch Waistband

Add comfort, ease, and perfect fit. Achieve the look of a fully tailored suit trouser with the ease of a sweatpant. With our stretch waistbands, there is no need to size up or build in pleats or gathers so you can maintain original suiting proportions while adding comfort and perfect fit.

Lightweight Top-Twill Interlining

Interlining for easy-care uniforms. This Top-Twill Interlining is great for washable jackets, though fine for dry cleaning as well. This fusible interlining smoothes out creases of jackets when folder or packed. Easy maintenance for any corporate employee.

Stretch Interlining

Allows stretch and movement in jackets. We offer a large range of two-way or four-way stretch Interlinings for lapel, facing, and front. Allows for stretch and movement, increases range of motion and ease, and eliminates differentials.

Corporate Uniform & Workwear

Medical (Scrubs+Lab Coat)

Stretch Interlining

Retain professional look with comfort of stretch. Our stretch interlining brings comfort to frontline workers in Lab Coats. Maintains professional look with the features of stretch and comfort.

Fusible Elastic (with or without a drawcord)

Cleaner look for an elastic waist.
Use our Fusible Elastic with or without a drawcord to achieve a lower profile than standard knitted elastic.
Adds comfort and perfect fit without bulk.

Corporate Uniform & Workwear

Performance Outerwear

Bonding Tape

Adds weather protection to zippers. Our Bonding Tapes offer a non-sew solution to weatherizing zippers. Apply over zipper placket for better protection.

Antimicrobial Lining

Protect against odor, degradation, and stains with antimicrobial lining. The warm and often moist environment next to the skin can lead to the growth of microorganisms, which can multiply on fabrics and result in odors, discoloration, staining, and fabric deterioration. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Seam Sealing Tape

Seal Seams to keep out the weather. Stitching poses an issue when it comes to water tightness. Our Seam Sealing Tapes are precision adhesive films applied to sewn seams to increase water repellency where required. These tapes are a fast and easy way to seam seal all kinds of products and are designed for application on a wide variety of fabrics.

Stretch Waistband

Add comfort, ease, and perfect fit. With our stretch waistbands, there is no need to size up to add comfort to workwear. Adds ease and performance for increased mobility and range of motion.

Abra-Stop®

Add tough, anti-abrasion characteristics. Abra-Stop® anti-abrasion fabric is ideal for use in high-abrasion areas on garments. This patented product is made from a technical polyester-cotton fabric with much better characteristics than the high-tenacity polyamide fabric generally used for knees, elbows, and pocket reinforcement. Though Abra-Stop is incredibly tough, it does not require any special equipment in the manufacturing process.

Intimates Shapewear

Bonding Tape

Elegant straps from outer textile fabric. Eliminate the disruption of unsightly straps and maintain integrity of the design by using the outer textile for sundries. This product bonds to outer fabric so you can cut it into limitless sizes and shapes. Enhances the body fabric with properties that allow it to move as the body demands with superior stretch and recovery. Eliminate the need for sundry lab dips and creates visual cohesion.

PowerStretch

Add zonal control. Our PowerStretch can be contoured to any shape to shadow your fit pattern and provide hidden support, control, and/or lifting in targeted areas such as waist and inner thigh. A variety of films can be combined to engineer custom solutions. These have high bond strength and stretch and recovery properties and are designed for comfort even with extended wear.

Intimates

Mens Briefs

Fusible Plush Elastic

OEKO-TEX®

No stitching.

This fusible elastic bonds to any fabric to create a no-sew, sleek profile that's ultra comfortable under clothing. The soft plush side faces the body for weightless comfort. Can be contoured to any shape for fashion, fit, or function.

Bonding Tape

Stop briefs from riding up and/or eliminate bulky seams.

When you want to get rid of seams in sensitive areas, use non-sew Bonding Tape. Bonding Tape can be used to join seams for a low profile, no-sew leg opening that stops briefs from riding up or for joining seams to reduce bulk and discomfort. Bonding Tapes can be perforated for maximum air flow and breathability.

Intimates Loungewear

Bonding Tape

Add comfortable hidden shelf bra. Our Bonding Tapes can be used to provide support, control, and/or lifting in hidden shelf bras in loungewear. Designed for long-wear, all-night comfort.

Antimicrobial stretch Interlining

Stop microbial growth from sweat emitted at night. The warm and often moist environment next to the skin can lead to the growth of microorganisms, which can multiply on fabrics and result in odors, discoloration, staining, and fabric deterioration. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Elastic Tape

Maintain original shape of loungewear. Our thin and light Elastic Tapes are made of high-grade pure TPU, a skin friendly and environmentally safe material that can decompose naturally. The elastic property of our tapes allows fabric to stretch yet fully recover to maintain its original shape through wear and wash. These tapes stabilize and maintain the inherent characteristics of collars, floating pockets, plackets, fashioning, and arm eyes without drooping or sagging.

Intimates Lingerie

Bonding Tape

Elegant straps from outer textile fabric.

Eliminate the disruption of unsightly straps and maintain integrity of the design by using the outer textile for sundries. This product bonds to outer fabric so you can cut it into limitless sizes and shapes. Enhances the body fabric with properties that allow it to move as the body demands with superior stretch and recovery. Eliminate the need for sundry lab dips and creates visual cohesion.

Invisible Adhesion

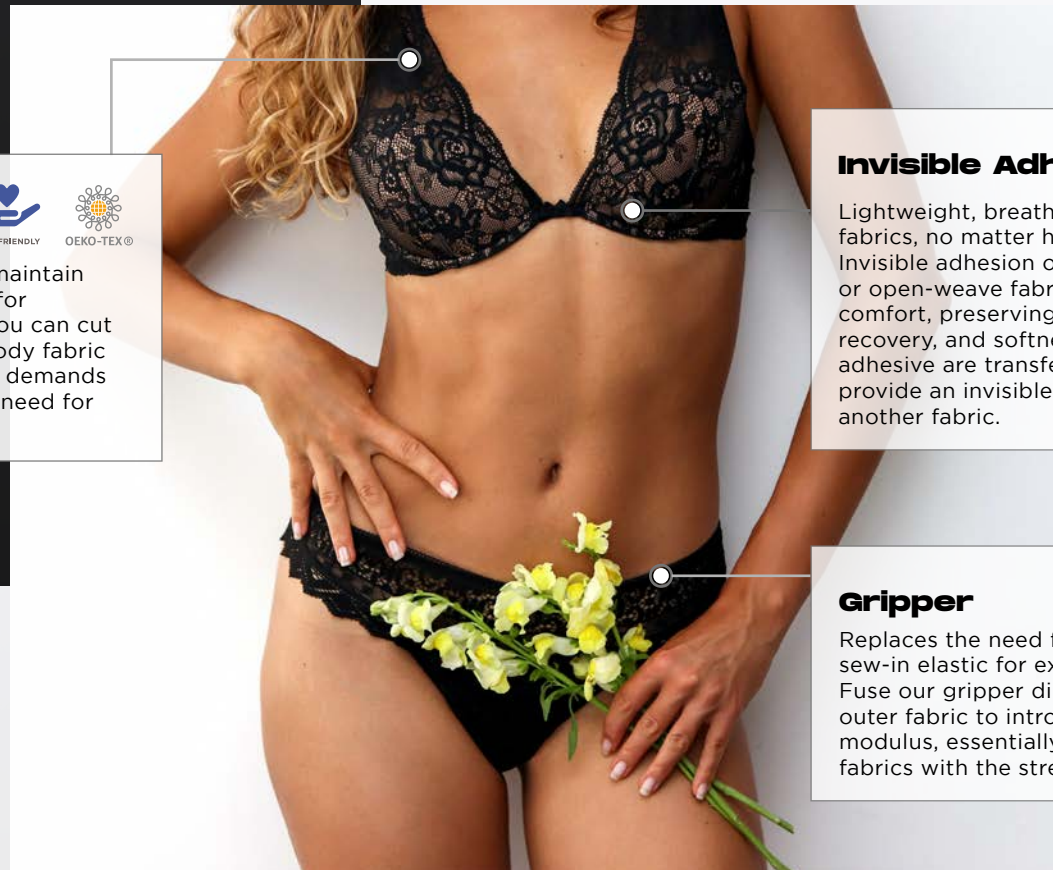

Lightweight, breathable adhesion of any two fabrics, no matter how open. Invisible adhesion offers a bonding solution for lace or open-weave fabrics that provides superior comfort, preserving the breathability, stretch, recovery, and softness of bonded areas. Dots of adhesive are transferred to the lace open-weave to provide an invisible bond when married with another fabric.

Gripper

Replaces the need for traditional sew-in elastic for extreme comfort. Fuse our gripper directly between your inner and outer fabric to introduce an increased level of modulus, essentially endowing your beautiful fabrics with the stretch and recovery of elastic.

Accessories & Headwear Backpack

Overlay Films

Express your brand.

Our Overlay Tapes are the perfect complement of performance and fashion.

Designed for ease of application and available in custom fashion elements for use as laser cut logos or design elements, as cuff/collar/zipper trim, and over bonded seams to eliminate fraying.

Stretch Binding Tape

Use decorative stretch binding tapes inside of handbags for a clean look.

Our Stretch Binding Tapes are non-bias stretch bindings developed to perform under extreme conditions yet retain stretch and color characteristics. Laser cut to required size providing a fray-free binding for ease of application and superior finish quality.

Antimicrobial Lining

Keep the inside of backpack clean and odor-free. Lainiere Performance Silver uses positively charged silver ions permanently embedded in the material to eliminate microbes on soft surfaces.

Abra-Stop®

Add tough, anti-abrasion characteristics.

Abra-Stop® anti-abrasion fabric is ideal for use in high-abrasion areas on garments. This patented product is made from a technical polyester-cotton fabric with much better characteristics than the high-tenacity polyamide fabric generally used for knees, elbows, and pocket reinforcement. Though Abra-Stop is incredibly tough, it does not require any special equipment in the manufacturing process.

Stretch Interlining

Tapes & Films

PowerStretch

PowerStretch blends comfort and performance in one unique and innovative product. Allowing for **maximum stretch and recovery** while retaining a soft hand feel, PowerStretch is a perfect solution for **better fitting**, more comfortable garments. This can also be used in specific ways to add **support, control, or compression to shapewear and garments**.

Available in both **wide width** for contour design and **custom-tape-sized** to cater to a wide variety of applications.

Overlay Films

Our Overlay Films are the perfect complement of performance and fashion. Designed for **ease of application and customizable for use as laser cut logos or designs**, cuff/collar/zipper trim, or over bonded seams to **eliminate fraying**. Single-sided adhesive films available in variable thicknesses (mil), tape widths (slit to size), and wide goods that can be cut to shape. Available in a range of colors (DTM to pantone), finishes, tints and textures. Our Overlay Films have an average breathability of 35-40% but when perforated can achieve up to 70% (fabric dependent). Provides **high stretch and recovery** with high wash results. Common applications are **decorative overlays, exposed bonding tapes, and logo branding**.

Bonding Tapes

Bonding Tapes are part of our performance technical film family of products, designed for use where there may be a high degree of movement and extended wear, but comfort is required. They are **soft, pliable, and moldable with superior stretch and recovery—the ideal solution for today’s activewear, performance, and intimate garments and accessories**. These high-quality, easy-application tapes provide superior bonding while retaining a soft, comfortable touch to the wearer.

Hem Tapes

Our Bonded Hem products stabilize hems while providing a **clean, low-profile look**.

Seam Sealing Tapes

Stitching poses an issue when it comes to water tightness. Our Seam Sealing Tapes are precision adhesive films applied to sewn seams to **increase water repellency** where required. These tapes are a fast and easy way to seam seal all kinds of products and are designed for application on a wide variety of fabrics.

Gripper Tape

Gripper Tape replaces traditional silicon and **reduces allergy** concerns, redness, irritation, and sweating propensities. Gripper Tape can be shaped for proprietary design and contouring. This special film has **high stretch and recovery**, and **high washability** while maintaining a **soft and luxurious hand**. Common applications are for **hemming, interlining, anti-slip, anti-roll, and logo branding**. This product is available in tape width (slit to spec) and wide goods.

Elastics

Fusible Elastics

Our range of fusible elastic solutions is designed to combine the benefits of stretch, recovery, comfort, and performance our customers have come to expect. Because of its **extreme elasticity in warp and weft directions**, our Fusible Elastics are ideal for large and small part fusing of very elastic outer fabrics. Applications are limited only by your imagination; use it anywhere you need a perfect fit that stays in place and long-lasting comfort.

Knit Elastics

Knitted elastic is made by knitting the fibers together and is often softer than braided or woven elastic. Because knitted elastics work well even when pierced by needles, they are **good choices for sew-on applications**. Soft, comfortable, and useful in a wide variety of applications, knitted elastics **resist curling and will not narrow when stretched**. Suitable for light to midweight fabrics.

Gripper Elastics

Silicone-backed elastics, also known as gripper elastics, are **perfect for any non-slip elastic needs**. They are multi-use products that can be used to **prevent slipping and to hold things down or up**. Perfect for **lingerie, open-leg tights, bike shorts and shirts, gymwear, and inside of trouser waistbands** to keep shirts from coming untucked.

Elastic Tape

Our thin and light Elastic Tapes are made of **high-grade pure TPU**, a skin friendly and environmentally safe material that can decompose naturally. TPU ensures a **very high standard of elasticity and long durability without skin irritation**.

The elastic property of our tapes allows fabric to stretch yet fully recover to maintain its original shape though wear and wash. These tapes stabilize and maintain the inherent characteristics of **collars, floating pockets, plackets, fashioning, and arm eyes without drooping or sagging**.

In addition to improving durability and shape, our elastic tapes also make garments feel better by providing **smooth and comfortable edges** to the wearer.

Draw Cord Elastics

Draw cord elastics have a built-in cord that can **expand up to twice the elastic length to give a more customized fit**. Drawstrings can be hidden on the inside of a garment or pulled through to the outside for use. They are commonly used in sportswear, sleepwear, and athleisure for adults and children.

Linings

Downproof

Our Downproof liner is designed to **prevent feathers and fibers from migrating outwards through shell fabrics and seams**. It keeps wearers comfortable and the down from spilling out while remaining soft and flexible enough to allow for natural movement. Downproof fabric can **enhance the life and look of down or fiberfill garments**.

Stretch

Our line of Stretch Linings allow for stretch and movement, **increasing range of motion, comfort, and ease** in jackets. Perfect for using with outer fabrics that have two-way or four-way stretch, when you want the liner to move with the jacket.

Performance Tailoring

Comfort Collar

Comfort Collar allows for comfort on the collarband with any shirting that has stretch properties. **Two-way stretch interlinings** add comfort to collars in performance shirting. Comfort Collar two-way stretch interlinings are available in a variety of qualities so you can dial in hand feel and weights.

Lightweight Washable Canvas

With our Lightweight Washable Canvas, you can maintain a **clean, tailored look even in an unstructured jacket or a jacket with stretch fabric**. Our Lightweight Washable Canvas provides form to a jacket while remaining lightweight and washable for today's knit suiting styles that allow for comfort and range of motion.

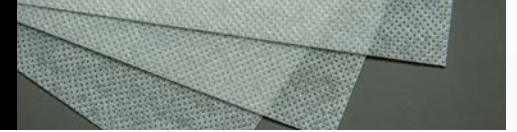

Lightweight Top-Twill Interlining

Our Lightweight Top-Twill Interlining is great for **washable jackets**, though fine for dry cleaning as well. This fusible interlining smooths out creases of jackets when folded or packed. Easy maintenance for any corporate employee.

Lightweight Washable Shoulder Pads

Lightweight washable shoulder pads allow for **durability, stretch, and movement in jackets** that may get **machine washed**.

Antimicrobial Products

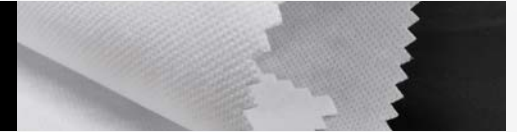

The warm and often moist environment next to the skin, where clothing lies, can lead to the growth of microorganisms. These microorganisms can multiply on fabrics, making them difficult to remove and resulting in odors, discoloration, staining, and fabric deterioration.

Lainiere Performance Silver uses **positively charged silver ions permanently embedded** in the material to **eliminate microbes on soft surfaces**. This includes bacteria, fungus, mold, and mildew. Certified safe with Oeko-Tex® Standard 100 accreditation.

Available products:

- Antimicrobial Lining
- Antimicrobial Interlining
- Antimicrobial Circular Knit

Anti-Abrasion

Abra-Stop® anti-abrasion fabric is ideal for use in high-abrasion areas on garments and a perfect match for **on-field sports, tactical, or hunting gear**.

This patented product is made from a technical resistant polyester-cotton fabric with much better characteristics than the high-tenacity polyamide fabric generally used for **knees, elbows, and pockets reinforcement**.

Though Abra-Stop is incredibly tough, it does not require any special equipment in the manufacturing process.

Wadding / Insulation

Our Eco-Fiberfill addresses the drive toward sustainability. Eco-Fiberfill is a very high-quality fiberfill that uses **certified recycled fibers** while providing **high TOG thermal retention values and soft hand for flexibility**. Eco-Fiberfill can be used across multiple garment applications.

Invisible Adhesion

Invisible adhesion offers a bonding solution for **lace or open-weave fabrics that provides superior comfort**, preserving the **breathability, stretch, recovery, and softness of bonded areas**. Dots of adhesive are transferred to the lace open weave to provide an invisible bond when married with another fabric.

Stretch Interlining

Low-Melt Stretch Interlining

Our fusible interlinings were developed to provide needed support and stability to garments and accessories whose **delicate nature and appearance** may suffer if exposed to the high temperatures and pressures of normal fusing conditions. With a focus on **ease of application**, these products have been designed to be fused with a **hand iron** at low temperatures. Recommended for use on **leather, suede, delicate or embellished fabrics**.

High Stretch Interlining

These unique high-stretch textured woven interlining styles provide enhanced elasticity and support for athleisure and lifestyle fashion garments.

Designed to move in conjunction with today's high-performance fabrics, these fusibles provide needed support while retaining a **soft hand**. They also provide **excellent drape** while providing great range of motion and **freedom of movement**.

Our high-stretch interlinings **stretch in all directions with minimal distortion and maximum recovery** and can be used in a great variety of applications.

Comfort Stretch Nonwoven

Evolving fashion trends reflect a move toward stretch and comfort in all garment categories. Our Comfort Stretch Nonwoven interlining collection offers **unparalleled stretch, performance, and comfort** for today's garments. This cutting-edge interlining conforms to the movement of the outer stretch fabric and provides optimum stretch, recovery, and comfort for the wearer.

High-Wash PX

Our 100% polyester Washable High Stretch Interlining is made specifically for **denim and heavy wash apparel**. Washable High Stretch Interlining provides **dynamic stretchability in all directions without distortion, high compatibility with elastane blend fabrics, and anti-pilling qualities**. This product retains its properties to perfectly support fabric even through heavy wash, bleaching, and/or garment dyeing.

Specialty Web

Our Specialty Webs act as targeted anchors for directly applied notions onto **sweater knits**. **Reinforces stitching and prohibits drooping**.

Performance Tailoring

Comfort Collar

Comfort Collar allows for comfort on the collarband with any shirting that has stretch properties. **Two-way stretch interlinings** add comfort to collars in performance shirting. Comfort Collar two-way stretch interlinings are available in a variety of qualities so you can dial in hand feel and weights.

Cap

You may know Chargeurs*PCC as the largest interlining provider in the world, but we also have a range of **high-quality inner components for headwear**. From crown to sweatband, we have products that can **improve comfort, fit and durability**.

Options of products with **anti-microbial/anti-odor** properties and **sustainable materials** set us apart.
