

THE FUTURE OF FABRIC TECHNOLOGY

ACTON

Our nano-technology is not just a part of our products;
it's the very heart of our innovation.
In every Acton product, from athletic wear to daily essentials,
you'll find the fusion of lightweight comfort and durable protection.

Redefining Fabric Technology for the Modern Era

Nano-Technology at Heart of Our Innovation

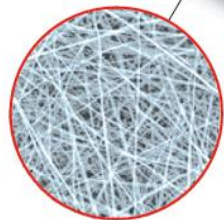

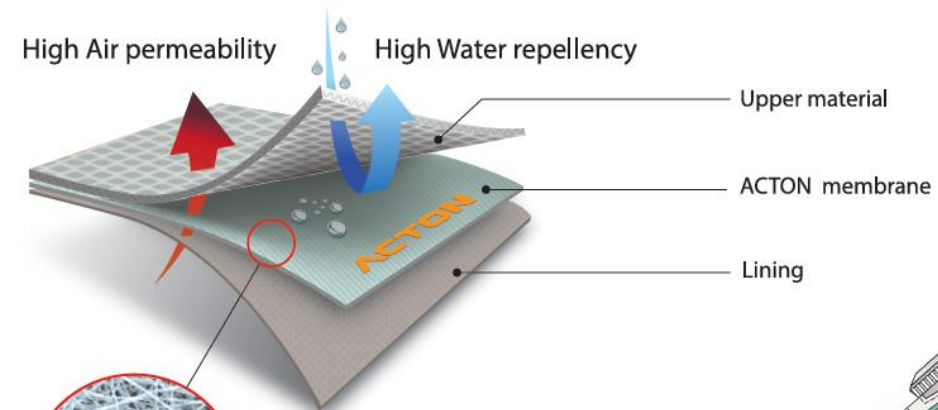

Exceptional Water Resistance and breathability

Acton is a textile technology that uses a high-performance porous membrane with waterproof and breathable properties. It blocks water droplets while allowing water vapor to escape, keeping the wearer comfortable. This membrane is composed of extremely small pores that block water and wind from entering while quickly releasing internal moisture. As a result, it provides excellent protection and comfort during outdoor activities or in various weather conditions.

symbole name : ALPHAGRAM

Designed with high-performance breathable materials, Acton Nano Tex ensures optimal airflow, keeping you cool and comfortable even during extended wear and intense activities.
