

The CMP logo is located in the top right corner. It consists of the letters 'CMP' in a white, bold, sans-serif font. A small red triangle is positioned above the letter 'M'. The logo is set against a black square background.

CMP

The background of the entire page is a photograph of a mountain range. The peaks are covered in snow and are illuminated by a warm, golden light, likely from a low sun during sunrise or sunset. The sky is filled with soft, colorful clouds in shades of pink, orange, and blue. In the foreground, there are snow-covered evergreen trees and a snowy slope.

CMP FOR A BETTER PLANET

Il cammino intrapreso da CMP verso la sostenibilità **"For a better Planet"** prevede diverse forme di intervento che riguardano non solo il prodotto e la scelta dei materiali ma l'azienda in senso generale, le persone, la governance e tutti i suoi stakeholder.

Per le nostre collezioni, stagione dopo stagione, ci stiamo impegnando per aumentare sempre più il numero di capi che contengono materiali eco-sostenibili, che abbiano quindi un minore impatto ambientale e che siano garantiti da certificazioni.

"Almeno il 50% del materiale riciclato" questa è la soglia che abbiamo stabilito oggi, affinché un nostro capo possa essere ritenuto ad impatto ambientale minore e rientrare tra i nostri capi eco-sostenibili. L'obiettivo per il futuro è aumentare sempre di più le percentuali per contribuire **"For a better Planet"**.

The journey started by CMP towards sustainability **"For a better Planet"** involves different forms of actions that concern not only the product and the selection of materials, but the company in a more general sense, as well as people, governance and all its stakeholders.

Season after season, we are striving to increase the number of garments in our collections that contain eco-sustainable materials, which therefore have a lower environmental impact and are guaranteed by certifications.

"At least 50% recycled material" is the target we have set today, so that one of our garments can be considered as having a lower environmental impact and be counted among our eco-sustainable garments. The goal for the future is to increase the percentages more and more to contribute **"For a better Planet"**.

Der von CMP eingeschlagene Weg zur Nachhaltigkeit **"For a better Planet"** beinhaltet verschiedene Interventionsformen, die nicht nur das Produkt und die Materialauswahl betreffen, sondern das Unternehmen im Allgemeinen, die Menschen, die Unternehmensführung und alle seine Interessengruppen. Für unsere Kollektionen streben wir Saison für Saison danach, die Anzahl der Kleidungsstücke zu erhöhen, die umweltverträgliche Materialien enthalten, die daher eine geringere Umweltbelastung haben und durch Zertifizierungen garantiert sind.

"Mindestens 50% recyceltes Material" – das ist der Schwellenwert, den wir heute festgelegt haben, damit eines unserer Kleidungsstücke als umweltfreundlicher eingestuft und zu unseren umweltfreundlichen Kleidungsstücken gezählt werden kann. Das Ziel für die Zukunft ist es, die Prozentsätze immer weiter zu erhöhen, um **"For a better Planet"** beizutragen.

UPPER TECHNOLOGIES

Le calzature vegan friendly di CMP sono costituite interamente da materiali che non sono di origine animale.

CMP's vegan friendly footwear is made entirely from materials that are not of animal origin.

Die vegan freundlichen Schuhe von CMP werden vollständig aus Materialien hergestellt, die nicht tierischen Ursprungs sind.

Nei trattamenti di impermeabilizzazione vengono utilizzate delle sostanze chimico-sintetiche che respingono l'acqua; il loro nome è PFC – perfluorocarburi – composti che una volta svolto il loro utilizzo faticano a smaltirsi nell'ambiente e sono quindi inquinanti e dannosi per la nostra salute. Nel corso degli anni, attraverso studi e ricerche si è riusciti a trovare una soluzione green al sistema di impermeabilizzazione totalmente PFC FREE. CMP si impegna con i suoi fornitori a proporre ogni anno più prodotti PFC FREE per salvaguardare l'ambiente e preservare la salute nostra e delle generazioni future.

Chemical-synthetic substances are used in waterproofing treatments to repel water; they are called PFC – perfluorocarbons – compounds that once used, are difficult to be disposed in the environment and they are therefore polluting and harmful to our health. Over the years, through studies and research it has been possible to find a green waterproofing system solution which is totally PFC FREE. With its suppliers, CMP is committed to offer more PFC FREE products every year to protect the environment and preserve our and future generations' health.

Bei den Wasser- und Feuchtigkeitsundurchlässigen Materialien werden chemisch-synthetische Substanzen verwendet, die eben diese abstoßen; ihr Name ist PFC – perfluorierte Kohlenwasserstoffe – Verbindungen, die, wenn sie einmal verwendet wurden, sich nur schwer in der Umwelt entsorgen lassen und daher umweltverschmutzend und gesundheitsschädlich sind. Im Laufe der Jahre wurde es möglich, durch Studien und Forschung, eine umweltfreundliche Lösung für das völlig PFC FREIE Wasser- und Feuchtigkeitsundurchlässige Material zu finden. CMP verpflichtet sich gemeinsam mit All seinen Lieferanten, jedes Jahr mehr und mehr PFC FREE-Produkte anzubieten, um die Umwelt zu schützen und unsere Gesundheit und die der künftigen Generationen zu bewahren.

Dalla nostra grande tradizione nell'abbigliamento sportivo è nata la membrana impermeabile specifica per le calzature con tecnologia CLIMA PROTECT. Questa membrana contiene al suo interno un particolare laminato termico in grado di proteggere il piede dall'acqua garantendo al tempo stesso grande traspirabilità. La membrana, infatti, ha dei micro fori di dimensioni tali da impedire alle molecole d'acqua di penetrare all'interno, ma allo stesso tempo permettono alle micro molecole di vapore acqueo di fuoriuscire. Grazie a questo sistema, garantiamo ai vostri piedi il massimo del comfort e del benessere durante qualsiasi attività outdoor.

Our exclusive, waterproof membrane with CLIMA PROTECT technology stems from our long-established sportswear tradition. This membrane includes a special thermal laminate which protects the feet against water while providing breathability. Its micro perforations are so minute as to prevent water molecules entering the footwear while allowing micro molecules of water vapour to exude. Thanks to this system, we ensure maximum comfort and wellbeing for your feet during any kind of outdoors activity.

Aus unserer großen Erfahrung mit Sportbekleidung ist eine wasserdichte Membran speziell für Schuhe mit der Technologie CLIMA PROTECT entstanden. Integriert in diese Membran ist ein besonderes, thermisches Laminat, das kein Wasser eindringen lässt und gleichzeitig überaus atmungsaktiv ist. Dazu hat die Membran Mikroöffnungen, die verhindern, dass Wassermoleküle in das Innere vordringen können, aber gleichzeitig den Austritt der Wasserdampfmoleküle ermöglichen. Mit diesem System können wir maximalen Komfort und angenehmes Fußklima bei allen Outdoor-Aktivitäten garantieren.

Primaloft® Gold I-1006F è l'imbottitura consigliata per l'uso nelle calzature e nella costruzione di scarponi da sci in cui si verifica una compressione ripetuta. Offre l'isolamento migliore della categoria, progettato per una lunga durata nel tempo. È idrorepellente dal momento che la costruzione ad alta densità mantiene lo spessore e continua a fornire un calore eccellente sotto la compressione e in condizioni di umidità favorendo un isolamento ad alte prestazioni. Primaloft® Gold I-1006F è realizzato con il 100% di materiale riciclato post consumo.

Primaloft® Gold I-1006F is the padding recommended for use in footwear and ski boot construction where repeated compression occurs. It provides best-in-class insulation, designed for long-lasting wear. It is water-repellent, as the high-density construction maintains its thickness and continues to provide excellent warmth under compression and in damp conditions, promoting high-performance insulation. Primaloft® Gold I-1006F is made with 100% post-consumer recycled material.

Primaloft® Gold I-1006F ist ein Isolationsmaterial, das für den Einsatz in Schuhen und Skischuhen, bei denen es zu wiederholter Kompression kommt, empfohlen wird. Es bietet die beste Isolierung seiner Klasse und ist auf Langlebigkeit ausgelegt. Es ist wasserabweisend, da das hochdichte Design seine Dicke beibehält und auch unter Kompression und in feuchten Bedingungen eine hervorragende Wärmeleistung bietet, was eine leistungsstarke Isolierung bewirkt. Primaloft® Gold I-1006F wird aus 100 % post-consumer-recyceltem Material hergestellt.

Thinsulate è il sistema di isolamento sintetico che contribuisce a restare caldi e asciutti intrappolando e conservando il calore del corpo, consentendo nel contempo la fuoriuscita dell'umidità. Composto da fibre idrofobiche, altamente resistenti all'acqua.

Thinsulate is the synthetic insulation helps you stay warm and dry by trapping and holding body heat while allowing moisture to escape. Made of extra water resistant, hydrophobic fibers.

Thinsulate ist die synthetische Isolation absorbiert die Körperwärme, speichert sie während Feuchtigkeit nach aussen abgeben wird. Hergestellt aus besonders wasserresistenten, wasserabweisenden Fasern.

Le calzature della linea fast hiking sono state realizzate utilizzando una particolare tecnologia di costruzione della tomaia, Lock, Wrap & Release, studiata appositamente per assicurare il giusto assetto del piede durante la corsa in montagna. La parte posteriore della scarpa blocca (LOCK) il tallone impedendo pericolosi slittamenti al suo interno, la parte mediale avvolge il collo del piede (WRAP) come un calzino assicurando il massimo del comfort nella fase di transizione del passo, mentre la parte anteriore lascia libero il piede (RELEASE) di spingere al suolo per generare il massimo della potenza propulsiva.

Fast hiking shoes use a special upper construction technology called Lock, Wrap & Release specifically designed to provide appropriate foot stability while trail running. The rear blocks (LOCK) the heel, preventing dangerous sliding inside the shoe, the medial section encloses (WRAP) the foot like a sock for maximum comfort in the step-transition stage, while the front part leaves the foot free (RELEASE) to push on the ground to generate maximum propulsion power.

Die Schuhe der Linie fast hiking werden unter Nutzung einer besonderen Konstruktionstechnologie der Oberschuhe, Lock, Wrap & Release, hergestellt, die für den richtigen Stand der Füße beim Laufen im Gebirge entwickelt wurden. Vom Heckteil (LOCK) wird die Ferse blockiert und gefährliches Rutschen im Schuh verhindert, der Mittelteil umschließt den Rist (WRAP) wie eine Socke und garantiert maximalen Komfort in der Übergangsphase der Schritte, während der vordere Teil den Fuß frei lässt (RELEASE), um gegen den Boden zu drücken und eine maximale Schubkraft zu erreichen.

Fitgo è il sistema di allacciatura a manopola pratico, veloce e sicuro. La regolazione sarà semplice e veloce, utilizzabile con una sola mano. Ruotando in senso orario si stringe l'allacciatura, mentre tirando verso l'alto la manopola rilascia rapidamente la tensione del cavo.

Fitgo is the practical, fast and safe knob lacing system. Adjustment is quick and easy, using just one hand. Turning clockwise tightens the lacing, while pulling up the knob quickly releases the cable tension.

Fitgo ist das praktische, schnelle und sichere Knopfschnürsystem. Die Einstellung erfolgt schnell und einfach mit nur einer Hand. Durch Drehen im Uhrzeigersinn wird die Schnürung gestrafft, durch Hochziehen des Knopfes wird die Kabelspannung schnell gelöst.

INSOLE TECHNOLOGIES

Ortholite®
comfort foam insoles

Leader mondiale nella produzione di solette interne realizzate con una particolare composizione di PU a celle aperte in grado di garantire numerosi benefici tra cui: Ammortizzazione garantita nel lungo periodo; Elevato livello di traspirabilità - la particolare composizione a celle aperte rende quasi il 100% della soletta traspirante; Gestione dell'umidità - l'umidità in eccesso viene espulsa lasciando il piede sempre fresco e asciutto; Lavabile anche in lavatrice; Massima leggerezza per non compromettere le performance della scarpa; Funzione antibatterica, grazie ad un trattamento brevettato a base di sali che impedisce la formazione di funghi, batteri e cattivi odori.

World leader in the manufacture of insoles made of a special open-cell PU compound that provides numerous benefits, including: Guaranteed long-term cushioning; High-level breathability - the special open-cell compound makes the insole almost 100% breathable; Moisture management - excess moisture is expelled, the foot is always cool and dry; Maximum lightness to prevent compromising the shoe's performance; Antibacterial function, a patented, salt-based treatment inhibits the development of fungi, bacteria and bad odours.

Weltweit führender Hersteller von Brandsohlen, die aus einem besonderen, offenporigen PU-Gemisch gebildet werden und zahlreiche Vorteile garantieren: Garantierte Dämpfung auf lange Zeit; Hohe Atmungsaktivität - die besondere, offenporige Zusammensetzung macht die Sohle zu fast 100% atmungsaktiv; Feuchtigkeitshaushalt - überschüssige Feuchtigkeit wird ausgestoßen und hält die Füße kühl und trocken; Reinigung auch in der Waschmaschine; Superleicht, um die Performance der Schuhe nicht zu beeinträchtigen; Antibakteriell, dank einer patentierten Ausrüstung auf Basis von Salzen wird die Entstehung von Pilzen, Bakterien und üblen Gerüchen verhindert.

Ortholite®
X35™

In risposta alla crescente domanda di livelli di rimbalzo più elevati, OrthoLite® amplia le proprie opzioni con offerte di elasticità personalizzate. La gamma consente di scegliere il rimbalzo più adatto alle proprie esigenze o di creare un'offerta "Good/Better/Best" per i consumatori. La schiuma OrthoLite® X35™ raggiunge valori di elasticità del 35 e del 25 per cento.

Responding to the growing demand for higher levels of rebound, OrthoLite® expands upon our game-changing options with customized elasticity offerings. The range allows you to pick the precise rebound for your needs—or create a Good/Better/Best offering for the consumers. OrthoLite® X35™ foam achieves elasticity ratings of 35 and 25 percent.

Als Reaktion auf die steigende Nachfrage nach höheren Rückfederungswerten erweitert OrthoLite® seine Möglichkeiten mit maßgeschneiderten Elastizitätsangeboten. Die Palette ermöglicht es Ihnen, die für Ihre Bedürfnisse am besten geeignete Rückfederung auszuwählen oder ein „Gut/Besser/Best“-Angebot für die Kunden zu erstellen. Der OrthoLite®-X35™-Schaumstoff erreicht Elastizitätswerte von 35 und 25 Prozent.

HI-P
Insole

La soletta Hi-Poly è realizzata con un rivoluzionario materiale eco-friendly, una sorta di spugna a base poliuretana lavorata con particolari additivi naturali. Questo materiale, molto più performante e traspirante dell'EVA, garantisce, grazie alla sua particolare struttura con milioni di microfori d'aria, una migliore ammortizzazione e maggiore assorbimento degli urti, una perfetta gestione dell'umidità e del sudore, oltre ad assicurare una funzione anti batterica e anti odore. Pur essendo molto leggere e flessibili hanno una durata di gran lunga superiore rispetto alle tradizionali solette in EVA.

The Hi-Poly insole is made with a revolutionary eco-friendly material; a sort of polyurethane-based sponge combined with special natural additives. This material, which is more effective and breathable than EVA, thanks to its special structure with millions of micro air holes, guarantees better cushioning and greater absorption of knocks, perfect management of moisture and sweat, in addition to ensuring an anti-bacterial and anti-odour function. Despite being very lightweight and flexible, these insoles last much longer than traditional EVA insoles.

Die Hi-Poly-Sohle wird aus einem revolutionären, umweltfreundlichen Material hergestellt. Dabei handelt es sich um eine Art Schaum auf der Grundlage von Polyurethan, der mit besonderen natürlichen Zusatzstoffen angereichert wurde. Dieses Material, das deutlich leistungsfähiger und atmungsaktiver als EVA ist, reagiert dank seiner besonderen Struktur mit Millionen von Mikro-Luftlöchern besser auf Feuchtigkeit und Schweiß, federt besser ab, sorgt für eine erhöhte Stoßfestigkeit, garantiert eine antibakterielle Wirkung und verhindert die Bildung von unangenehmen Gerüchen. Trotz ihres geringen Gewichts und ihrer hohen Flexibilität halten die Sohlen deutlich länger als die traditionellen Sohlen aus EVA.

SOLE TECHNOLOGIES

Le soles FullOn GRIP nascono da un attento studio delle esigenze dei nostri clienti durante tutte le loro attività outdoor. Grazie ad un intenso lavoro di ricerca e di test siamo riusciti a trovare una particolare combinazione di mescola in grado di offrire il massimo delle prestazioni in tutte le attività per le quali le nostre scarpe sono state pensate. Tenuta, trazione e durezza raggiungono un perfetto equilibrio nelle soles FullOn GRIP, che vengono poi declinate nei vari modelli a seconda delle specifiche necessità mediante l'utilizzo di geometrie variabili dei tasselli, l'utilizzo di densità differenti e l'applicazione di inserti in TPU.

FullOn GRIP soles are the result of a detailed survey of our customers' needs during their outdoors activities. Following a major process of research and testing, we found a particular blend of compound capable of delivering maximum performance in all the kinds of activities our footwear was designed for. FullOn GRIP soles provide a perfect balance of grip and durability. The use of differently shaped studs, different densities and TPU inserts means the soles are adapted for our various models according to the specific requirements.

Sohlen FullOn GRIP sind aus dem Studium der Bedürfnisse der Benutzer bei allen Outdoor-Aktivitäten entstanden. Dank eingehender Forschung und umfangreicher Tests ist es gelungen, eine besondere Materialmischung zu entwickeln, die beste Leistungen bei allen Aktivitäten garantiert, für die unsere Schuhe bestimmt sind. Trittfestigkeit, Traktion und Haltbarkeit sind in Sohlen FullOn GRIP perfekt ausgewogen und werden in den einzelnen Modellen je nach besonderen Anforderungen abgewandelt, wobei verschiedene Geometrien der Noppen, unterschiedliche Härten und Einsätze aus TPU verwendet werden.

OCsystem® è l'innovativa soluzione antiscivolo con brevetto internazionale. L'applicazione del sistema antiscivolo incrementa il grip della calzatura rendendo comodo e stabile il passo su qualsiasi superficie ricoperta da ghiaccio. OCsystem® viene ancorato alla suola in fase di produzione, diventandone parte integrante. Il sistema è composto da un telaio realizzato in uno speciale poliuretano che mantiene le caratteristiche di elasticità e resistenza anche a temperature estreme, struttura al quale sono presenti chiodini in acciaio inossidabile.

OCsystem® is the innovative anti-slip solution with an international patent. The application of the anti-slip system increases the grip on the footwear, making walking comfortable and stable on any ice-covered surface. The OCsystem® is attached to the sole during the manufacturing phase, becoming an integral part of it. The system consists of a frame made of a special polyurethane which maintains the characteristics of elasticity and resistance even at extreme temperatures, with stainless steel nails forming part of the structure.

Das OCsystem® ist die innovative, international patentierte rutschhemmende Lösung. Die Anwendung des rutschhemmenden Systems erhöht den Halt des Schuhs und macht das Gehen auf jeder eisbedeckten Oberfläche komfortabel und stabil. Das OCsystem® wird in der Produktionsphase in der Sohle verankert und wird so zu einem integralen Bestandteil der Sohle. Das System besteht aus einem Rahmen aus speziellem Polyurethan, das seine Elastizität und Widerstandsfähigkeit auch bei extremen Temperaturen beibehält, sowie aus einer Struktur, an der Stollen aus rostfreiem Stahl befestigt werden.

GRIPonICE è utilizzato su alcune soles adatte ad un uso invernale. Un concentrato di tecnologia e ricerca capace di creare una particolare miscela di gomma (60%), silice (30%), fibra di vetro (10%) in grado di garantire tenuta e trazione sia su superfici ghiacciate secche che su quelle più bagnate e insidiose. Forma e profili dei tasselli GRIPonICE sono studiate appositamente per garantire contemporaneamente grip sulle superfici ghiacciate e bagnate ma anche durata se utilizzati su superfici dure e asciutte.

GRIPonICE is a compound used on some soles suited to winter use. A concentration of technology and research which has culminated in a special compound of rubber (60%), silica (30%) and fibreglass (10%), guaranteeing grip and traction of both dry icy surfaces and wet, slippery ones. The shape and outline of GRIPonICE lugs have been specially developed to guarantee grip on both icy and wet surfaces as well as hard, dry surfaces.

GRIPonICE ist eine spezielle Mischung, die bei einigen wintertauglichen Sohlen zum Einsatz kommt. Ein Konzentrat an Technik und Forschung, aus dem eine besondere Mischsohle aus Gummi (60%), Kieselgel (30%) und Glasfaser (10%) geschaffen wurde, die Halt und Zugkraft auf trockenen vereisten und nassen und schwierigeren Oberflächen garantiert. Die Form und das Profil der Stollen GRIPonICE sind entwickelt worden, um sowohl Grip auf vereisten und nassen Oberflächen als auch Dauerhaftigkeit bei harten und trockenen Oberflächen zu garantieren.

Mentre altre scarpe ti costringono a scegliere tra grip e durata, la mescola di gomma proprietà di HyperGrip offre il meglio di entrambi. HyperGrip è un marchio leader a livello globale nelle soles in gomma ad alte prestazioni per i mercati all'aperto, di lavoro e ricreativi. Dal 1988, HyperGrip produce le soles più avanzate con le più moderne attrezzature e design.

While other shoes force you to choose between grip and durability, the rubber compound property of HyperGrip offer the best of both. HyperGrip is a global leading brand in high performance rubber soles for outdoor, work and recreation markets. Since 1988, HyperGrip has been producing the most advanced outsoles with the latest equipment and designs.

Während andere Schuhe Sie dazu zwingen, zwischen Grip und Haltbarkeit zu wählen, bietet die HyperGrip-Gummimischung das Beste von beidem. HyperGrip ist eine weltweit führende Marke für Hochleistungs-Gummisohlen für den Outdoor-, Business- und Freizeitsektor. Seit 1988 produziert HyperGrip die fortschrittlichsten Sohlen mit der modernsten Ausrüstung und dem innovativsten Design.

La tecnologia Ice Lock di Hyper Grip è nata dalla necessità di non rinunciare a una corsa o ad una escursione quando la neve copre le strade o i sentieri e dalla frustrazione di dover comprare scarpe diverse a seconda della stagione, del clima o delle precipitazioni. Le soles Ice Lock di Hyper Grip aumentano fino a 6 volte la trazione e la resistenza allo scivolamento su ghiaccio e superfici bagnate, grazie ad alcuni inserti dotati di filamenti di micro vetro, allineati magneticamente per creare una tensione superficiale antiscivolo. I tasselli con tecnologia Ice Lock sono caratterizzati da delle strisce distinte grigie e nere e la loro forma è studiata appositamente per avere un consumo in linea con la normale durata di una scarpa.

Ice Lock technology by Hyper Grip stems from the desire to be able to go running or hiking even when there is snow on roads and trails and from the frustration of having to buy different shoes depending on the season, weather or rainfall. The Ice Lock by Hyper Grip soles increase traction and anti-slip resistance on ice and wet ground up to six times thanks to the inserts with micro-glass filaments, magnetically aligned to create slip-stopping surface tension. Lugs with Ice Lock technology have distinctive grey and black stripes and their shape is specially designed to improve durability, so they last as long as standard shoes.

Die Technologie Ice Look di Hyper Grip entstand aus der Notwendigkeit, nicht auf einen Lauf oder eine Exkursion verzichten zu können, wenn Schnee die Straßen und Wege bedeckt, und aus dem Frust heraus, für jede Saison, jedes Klima und jeden Niederschlag ein anderes Schuhwerk kaufen zu müssen. Die Sohlen Ice Lock di Hyper Grip erhöhen die Zugkraft und die Rutschfestigkeit auf Eis und nassen Oberflächen um das 6fache dank einiger Einlagen aus Mikroglassfaser, die magnetisch aufeinandergerichtet sind, um eine rutschfeste Oberflächenspannung zu schaffen. Die Stollen mit Ice Lock-Technologie sind durch graue und schwarze Streifen gekennzeichnet und ihre Form ist so entwickelt worden, dass sie gleich mit der normalen Lebensdauer eines Schuhs abnutzen.

Il sughero è un tessuto vegetale di rivestimento, che ricopre il fusto e le radici delle piante legnose nelle quali sostituisce l'epidermide. Il sughero, per le ottime caratteristiche isolanti, viene utilizzato nell'industria calzaturiera. È un prodotto 100% naturale, che può essere recuperato e riutilizzato.

Cork is a vegetable covering fabric, which covers the stem and roots of woody plants in which it replaces the epidermis. Because of its excellent insulating properties, cork is used in the footwear industry. It is a 100% natural product, which can be recovered and reused.

Kork ist ein pflanzliches Abdeckgewebe, das den Stamm und die Wurzeln von holzigen Pflanzen bedeckt, wobei es die Epidermis ersetzt. Aufgrund seiner hervorragenden Isolationseigenschaften wird Kork in der Schuhindustrie verwendet. Es handelt sich um ein 100%iges Naturprodukt, das zurückgewonnen und wiederverwendet werden kann.

EVA riciclata prodotta dal riutilizzo di EVA triturrata e reinserita nel materiale vergine con diverse percentuali, promuovendo l'economia circolare e la sostenibilità. L'EVA riciclata mantiene le caratteristiche originali dell'EVA, ovvero flessibilità, leggerezza, comfort e resistenza all'abrasione.

Recycled EVA produced by reusing shredded EVA and reinserting it into virgin material at different percentages, promoting the circular economy and sustainability. Recycled EVA retains the original characteristics of EVA, namely flexibility, lightness, comfort and abrasion resistance.

Recyceltes EVA, das durch die Wiederverwendung von geschreddertem EVA und dessen Wiedereinfügung in neues Material zu unterschiedlichen Prozentsätzen hergestellt wird, fördert die Kreislaufwirtschaft und Nachhaltigkeit. Recyceltes EVA behält die ursprünglichen Eigenschaften von EVA bei, nämlich Flexibilität, Leichtigkeit, Komfort und Abriebfestigkeit.

VIBRAM® COMPOUND - XS TREK

Vibram® XS TREK è una miscela tecnica che permette di ottenere ottime performance in attività outdoor, multisport, mountain bike, snow sports e sport d'acqua. Le sue caratteristiche principali sono la massima flessibilità e la trazione sul bagnato. La Vibram® XS TREK è una miscela non-marking, che può essere utilizzata nelle attività sportive indoor e nautiche. La miscela Vibram® XS TREK è usata in una vasta gamma di modelli e ottimizza le performance della suola in base alla sua specifica applicazione.

Vibram® XS TREK is a technical compound that allows great overall performance for outdoor, multisport, mountain bike, snow sports, and water sports. Its principal characteristics are flexibility and wet traction. Vibram XS TREK is a no-marking compound which can be used for indoor and nautical sports. The Vibram XS TREK compound is used in a wide range of designs and optimises the performance of the sole with respect to the specific application.

Vibram® XS TREK ist ein technischer Materialmix, der bei Outdoor-Aktivitäten, Multisportarten, Mountainbiking, Schneesport und Wassersport optimale Leistungen garantiert. Seine Hauptmerkmale sind maximale Flexibilität und Traktion bei Nässe. Vibram® XS TREK ist ein „non-marking“-Materialmix, der für Indoor- und Wassersportaktivitäten verwendet werden kann. Der Vibram®-XS-TREK-Materialmix wird in einer Vielzahl von Modellen verwendet und optimiert die Leistung der Sohle entsprechend ihrer spezifischen Anwendung.

VIBRAM® SOLES

RUSTLE S2364 - TYTANUS WP & HURANUS WP

- 1 - Equilibrio ottimale tra trazione e durata
- 2 - Ispirazione del design data dall'originale CARRARMATO Vibram
- 3 - Tasselli Vibram Traction Lugs per la massima trazione
- 4 - Compound della gomma progettato per assicurare performance, durata e trazione
- 5 - Intersuola in EVA per leggerezza e assorbimento degli urti

- 1 - Optimal balance of traction and durability
- 2 - Vibram CARRARMATO, the original Vibram traction lug design
- 3 - Vibram Traction Lugs for maximum traction
- 4 - Rubber compound designed to ensure performance, durability and traction
- 5 - EVA midsole for lightness and shock absorption

- 1 - Ottimale Balance zwischen Traktion und Haltbarkeit
- 2 - Vibram CARRARMATO, das originale Vibram Traktionsstollendesign
- 3 - Vibram Traction Lugs für maximale Traktion
- 4 - Gummimischung, die Leistung, Haltbarkeit und Traktion gewährleistet
- 5 - EVA-Zwischensohle für Leichtigkeit und Stoßdämpfung

SKELETON Q169 - DHENIEB WP

- 1 - Intersuola in EVA, minimo peso e massimo assorbimento degli urti
- 2 - Tasselli con ampia area di appoggio per una migliore stabilità
- 3 - Paraurti in punta per protezione del piede
- 4 - Larga area di appoggio per un grip maggiore sulle superfici rocciose
- 5 - Lateralenti dentellati per maggiore stabilità

- 1 - EVA midsole for lightness and impact absorption
- 2 - Lugs with wide support area for improved stability
- 3 - Toe-bumper for foot protection
- 4 - Wide support area for a better grip on rocky surfaces
- 5 - Notched sides for greater stability

- 1 - EVA-Zwischensohle für Leichtigkeit und Stoßdämpfung
- 2 - Bestandteile mit großer Trittlfläche für mehr Stabilität
- 3 - Stoßdämpfer an der Schuhspitze, um den Fuß zu schützen
- 4 - Große Trittlfläche für mehr Grip auf felsigen Oberflächen
- 5 - Gezackte Ränder für mehr Stabilität

TSAVO 1206 - ATHUNIS WP & MOON WP

- 1 - Larga area di appoggio per un grip maggiore sulle superfici rocciose
- 2 - Incisioni anteriori e posteriori per avere tenuta anche su terreni irregolari
- 3 - Tasselli VIBRAM® Multitraction per la massima trazione
- 4 - Paraurti in punta per protezione del piede
- 5 - Tallone asimmetrico per un appoggio più naturale

- 1 - Wide support area for a better grip on rocky surfaces
- 2 - Front and rear incisions for grip on uneven ground too
- 3 - VIBRAM® Multitraction lugs for ultimate traction
- 4 - Toe-bumper for foot protection
- 5 - Asymmetric heel for more natural support

- 1 - Große Trittlfläche für mehr Grip auf felsigen Oberflächen
- 2 - Einkerbungen vorne und hinten, um auch auf unregelmäßigen Böden Halt zu haben
- 3 - VIBRAM® Multitraction-Bestandteile für maximale Traktion
- 4 - Stoßdämpfer an der Schuhspitze, um den Fuß zu schützen
- 5 - Asymmetrische Ferse für ein natürlicheres Aufsetzen

ARONNE 878K - MINTAKA WP

- 1 - Grande area di contatto per grip su roccia
- 2 - Canali di drenaggio dell'acqua per migliorare il grip sul bagnato e la sicurezza
- 3 - Tallone asimmetrico per un contatto naturale
- 4 - Compound della gomma progettato per assicurare performance, durata e trazione
- 5 - Intersuola in EVA per leggerezza e assorbimento degli urti

- 1 - Large contact area for grip on rock
- 2 - Water draining channels to enhance grip on wet and safety
- 3 - Asymmetrical heel for natural touch-down
- 4 - Rubber compound designed to ensure performance, durability and traction
- 5 - EVA midsole for lightness and shock absorption

- 1 - Große Trittlfläche für mehr Grip auf felsigen Oberflächen
- 2 - Integriertes Kanalsystem zum Wasserableiten für bessere Sicherheit und Halt bei Nässe
- 3 - Asymmetrische Ferse für ein natürliches Aufsetzen
- 4 - Gummimischung, die Leistung, Haltbarkeit und Traktion gewährleistet
- 5 - EVA-Zwischensohle für Leichtigkeit und Stoßdämpfung

PREDATOR II S661 - ELETTRA WP

- 1 - Larga area di appoggio per un grip maggiore sulle superfici rocciose
- 2 - Incisioni anteriori e posteriori per avere tenuta anche su terreni irregolari
- 3 - Flex lines per favorire la rullata naturale e il comfort
- 4 - Tasselli VIBRAM® Multitraction per la massima trazione
- 5 - Fondo in gomma sottile in grado di assicurare il giusto rapporto leggerezza/durata

- 1 - Wide support area for a better grip on rocky surfaces
- 2 - Front and rear incisions for grip on uneven ground too
- 3 - Flex lines for a natural roll and comfort
- 4 - VIBRAM® Multitraction lugs for ultimate traction
- 5 - Thin rubber sole ensuring the right balance between lightness and durability

- 1 - Große Trittfläche für mehr Grip auf felsigen Oberflächen
- 2 - Einkerbungen vorne und hinten, um auch auf unregelmäßigen Böden Halt zu haben
- 3 - Flex Lines, um das natürliche Abrollen und den Komfort zu erhöhen
- 4 - VIBRAM® Multitraction-Bestandteile für maximale Traktion
- 5 - Sohle aus dünnem Gummi, um für das Richtige Verhältnis zwischen Leichtigkeit und Haltbarkeit zu sorgen

BAYU S1932 - MARCO OLMO 2.0 WP

- 1 - Intersuola in EVA, minimo peso e massimo assorbimento degli urti
- 2 - Design VIBRAM S-line che riflette e completa il movimento naturale del piede
- 3 - Tasselli VIBRAM Helix progettati per potenziare la trazione e la frenata
- 4 - Compound della gomma progettato per assicurare performance, durata e trazione
- 5 - Canali di pulizia dal fango per la sicurezza sulle superfici pesanti

- 1 - EVA midsole for lightness and impact absorption
- 2 - VIBRAM S-line design that reflects and complements the natural movement of the foot
- 3 - VIBRAM Helix lugs designed for enhanced traction and braking
- 4 - Rubber compound designed to ensure performance, durability and traction
- 5 - Mud clearing channels for safety on heavy surfaces

- 1 - EVA-Zwischensohle für Leichtigkeit und Stoßdämpfung
- 2 - VIBRAM S-line Design, das die natürliche Bewegung des Fußes reflektiert und ergänzt
- 3 - VIBRAM Helix-Stollen für verbesserte Traktion und Bremsen
- 4 - Gummimischung für hohe Leistung, Haltbarkeit und Traktion
- 5 - Schlammableitende Kanäle für Sicherheit auf schweren Oberflächen

KLETTERLIFT #148 - DORADO WP

- 1 - Ampi tasselli esterni per prolungare la durata della suola
- 2 - Tasselli esterni inclinati per fornire notevole capacità di tenuta sia in salita che in discesa
- 3 - Compound della gomma progettato per assicurare performance, durata e trazione
- 4 - Tasselli squadrati per una maggiore frenata
- 5 - I tasselli laterali sono accoppiati per fornire stabilità, ma separati per assicurare maggiore trazione.

- 1 - Wide external lugs for greater sole durability
- 2 - External angled lugs to provide extra grip both on uphill and downhill sections
- 3 - Rubber compound designed to ensure performance, durability and traction
- 4 - Square-shaped lugs for improved braking action
- 5 - The side lugs are featured in pairs to provide stability, but separated to ensure greater traction.

- 1 - Breite Außenstollen, damit die Sohle länger hält
- 2 - Gebogene Stollen außen für einen bemerkenswerten Halt sowohl beim Aufstieg als auch beim Abstieg
- 3 - Gummigemisch entwickelt, um Leistung, Dauer und Zugkraft zu gewährleisten
- 4 - Quadratische Stollen für ein besseres Abbremsen
- 5 - Die Stollen an der Seite sind verbunden, um Stabilität zu geben, und getrennt um eine höhere Zugkraft zu gewährleisten.

NEO MULTISPORT Q907 - LOTHAL WP & LOTHAL

- 1 - Ampia zona di contatto anteriore per ottima presa
- 2 - Intersuola in EVA per ridurre il peso e migliorare l'assorbimento degli urti
- 3 - Paracolpi per la protezione del piede e la maggiore presa
- 4 - Tasselli multi direzionali per una trazione a 360°
- 5 - Canali di pulizia dal fango per la sicurezza sulle superfici pesanti

- 1 - Large contact toe for grip performance
- 2 - EVA midsole to reduce weight and improve shock absorbing
- 3 - Toe bumper for foot protection and better grip
- 4 - Multi directional lugs for traction at 360°
- 5 - Mud clearing channels for safety on heavy surfaces

- 1 - Große Kontaktfläche an den Zehen für besseren Grip
- 2 - EVA-Zwischensohle zur Gewichtsreduzierung und besseren Stoßdämpfung
- 3 - Zehenpuffer für Fußschutz und erhöhte Grip
- 4 - Multidirektionale Stollen für Rundum-Traktion
- 5 - Schlammableitende Kanäle für Sicherheit auf schweren Oberflächen

FISH & CHIPS S1576 - KIDS MOON WP

- 1 - Ampia area di appoggio per migliori performance in termini di grip
- 2 - Tasselli larghi per una maggiore stabilità
- 3 - Compound della gomma progettato per assicurare performance, durata e trazione
- 4 - Design aperto autopulente per maggiore sicurezza e trazione
- 5 - Design dei tasselli bi-direzionale per trazione e frenata

- 1 - Wide support area for improved grip performance
- 2 - Wide lugs for better stability
- 3 - Rubber compound designed to ensure performance, durability and traction
- 4 - Open, self-cleaning design for greater safety and traction
- 5 - Bi-directional lug design for traction and braking

- 1 - Große Abstützfläche für optimalen Grip
- 2 - Breite Noppen für mehr Stabilität
- 3 - Gummimischung für hohe Leistung, Haltbarkeit und Traktion
- 4 - Offenes, selbstreinigendes Design für mehr Sicherheit und Traktion
- 5 - Bidirektionale Noppen-Design für Traktion und Bremsen

SOCKS

SOCKS TECHNOLOGIES

Il Grafene viene prodotto a partire dalla grafite ed è costituito da uno strato monoatomico di atomi di carbonio, disposti in una struttura esagonale. È il materiale più sottile che esiste in natura con lo spessore di un singolo atomo. Le sue principali proprietà sono l'alta tenacità e resistenza all'abrasione, l'antistaticità e conduttività e la termoregolazione: esso infatti può mantenere stabile la temperatura corporea basale senza che si rilevino forti sbalzi termici in caso di variazioni della temperatura ambiente o di sforzo fisico

Graphene is produced from graphite and is made up of a monatomic layer of carbon atoms, arranged in a hexagonal structure. With the thickness of a single atom, it is the thinnest material that exists in nature. Its main properties are high-tenacity and abrasion resistance, anti-static and conductivity, and heat regulation: in fact, it can keep the basal body temperature stable without experiencing temperature fluctuations in the event of changes in ambient temperature or physical effort.

Graphen wird aus Graphit hergestellt und besteht aus einer monoatomaren Schicht von Kohlenstoffatomen, die in einer hexagonalen Struktur angeordnet sind. Es ist das dünnste Material, das es in der Natur gibt, mit der Dicke eines einzigen Atoms. Seine wichtigsten Eigenschaften sind hohe Festigkeit und Abriebfestigkeit, Antistatik und Leitfähigkeit sowie Wärmeregulierung: Es kann eine stabile Körpertemperatur ohne große Temperaturschwankungen bei Veränderungen der Umgebungstemperatur oder körperlicher Anstrengung aufrechterhalten.

La fibra THERMOCOOL™ è progettata per lavorare in simbiosi con le naturali funzionalità di autoregolazione termica del corpo, attraverso sezioni intelligenti a geometria variabile (incrocio tra THERMOLITE e COOLMAX). THERMOCOOL™ offre una bi-regolazione per mantenere il corpo sempre nella sua Comfort Zone. Ti aiuta a essere caldo quando fuori fa freddo e aiuta a raffreddare e a portare all'esterno la sudorazione quando invece fa caldo. THERMOCOOL™ consente di migliorare il benessere fisico in modo da permettere di concentrarsi sulla performance atletica.

THERMOCOOL™ fibre is designed to work in symbiosis with the body's natural heat regulation functions through variably-sized smart sections (blend of THERMOLITE and COOLMAX). THERMOCOOL™ offers bi-regulation to keep the body in its comfort zone. It helps you feel warm when it's cold outside and helps you to cool down and wicks away perspiration when it's hot. THERMOCOOL™ improves your physical wellbeing so you can concentrate on your sports performance.

Die Faser THERMOCOOL™ wurde entwickelt, um die natürlichen Funktionen der Wärmeregulierung des Körpers mit Hilfe von intelligenten Faserquerschnitten variabler Geometrie zu optimieren (Kreuzung zwischen THERMOLITE und COOLMAX). THERMOCOOL™ sorgt mit der Technologie Duoregulation dafür, dass der Körper immer in der Komfortzone bleibt. Sie hält warm, wenn es kalt ist, aber kühl und führt den Schweiß nach außen ab, wenn es warm ist. THERMOCOOL™ verbessert das körperliche Wohlbefinden, damit man sich voll auf die sportliche Leistung konzentrieren kann.

Il lenpur è un filato in pura cellulosa, ecologico e salutare ricavato dalla potatura di alberi appositamente coltivati. La superficie della fibra è caratterizzata da piccole rotondità che donano un particolare effetto morbido alla calza. Grazie al suo alto livello di assorbimento ed alla capacità di rilasciare armonicamente l'umidità, questo filato ha eccellenti proprietà di regolazione termica. La fibra (idrofila) assorbe facilmente ma altrettanto facilmente è in grado di rilasciare (permeabile) l'umidità in eccesso, garantendo una superficie sempre asciutta e direttamente collegata e regolata alla temperatura corporea. La fibra Lenpur ha inoltre la caratteristica di emanare, dopo un qualsiasi contatto con il corpo, una quantità di odori ridotta in confronto ad altre fibre.

Lenpur is a pure cellulose, eco-friendly and healthy yarn made from the prunings of trees grown for that purpose. The fibre's surface has tiny spheres that give the sock a special soft effect. Thanks to its exceptional level of absorption and ability to release moisture, this yarn has excellent heat-regulation qualities. The fibre easily absorbs (hydrophilic) excessive moisture and equally easily releases it (permeable) to ensure the surface is always dry and directly related to and regulated by the body temperature. Furthermore, compared to other fibres, Lenpur releases less odour after being in contact with the skin.

Lenpur ist eine reine Zellulosefaser, ökologisch nachhaltig und besonders hautverträglich, die aus dem Schnitt speziell gepflanzter Bäume gewonnen wird. Die runderliche Faseroberfläche verleiht den Socken einen besonders weichen Griff. Dank sehr guter Absorptionsfähigkeit und gleichmäßiger Abgabe der Feuchtigkeit garantiert dieses Garn auch eine exzellente wärmeregulierende Wirkung. Die Faser kann Feuchtigkeit wirksam absorbieren (hydrophil), aber ebenso wirksam (wasserdurchlässig) überschüssige Feuchtigkeit wieder abgeben, sodass die Oberfläche stets trocken bleibt, direkt mit der Körpertemperatur verbunden ist und nach ihr geregelt wird. Lenpur-Fasern sind auch deodorisierend, sodass nach einem beliebigen Körperkontakt weniger Gerüche abgegeben werden als von anderen Fasern.

Dalla ricerca Aquafil è nata Dryarn, l'innovativa microfibrilla in polipropilene che garantisce elevati livelli di performance anche in contesti di utilizzo estremi. Resistente ma leggera, isolante ma traspirante. Dryarn è la fibra più leggera esistente in natura e per questo i capi che utilizzano questa tecnologia regalano una piacevole sensazione di comfort e leggerezza anche dopo molte ore di attività. Dryarn è anche una fibra "naturalmente" batteriostatica e grazie alla condizione di "asciutto" del tessuto, che permane anche durante l'attività sportiva, inibisce la proliferazione della flora batterica, scongiurando la formazione di irritazioni, allergie o dermatiti.

From Aquafil's research comes Dryarn, an innovative polypropylene microfibre which guarantees high-performance even under extreme conditions. Strong yet light, insulating yet breathable. Dryarn is the lightest fibre existing in nature, which means that the clothes with this technology provide a pleasant feeling of comfort and lightness even after many hours of physical activity. Dryarn is also a naturally bacteriostatic fibre and the fabrics dry condition, which is maintained even during sports activity, inhibits the proliferation of bacterial flora, thereby preventing skin irritation, allergies or dermatitis.

Aus der Forschung Aquafil ist Dryarn entstanden, die innovative Mikrofaser aus Polypropylen. Sie garantiert beste Leistung auch unter extremen Einsatzbedingungen. Widerstandsfähig aber leicht, isolierend aber atmungsaktiv. Dryarn ist die leichteste, in der Natur vorkommende Faser. Kleidungsstücke mit dieser Technologie vermitteln daher auch nach langen Stunden körperlicher Tätigkeit ein angenehmes Gefühl von Komfort und Leichtigkeit. Dryarn ist auch eine "natürlich" bakteriostatische Faser und dank der "trockenen" Eigenschaft des Gewebes, die auch bei sportlicher Aktivität erhalten bleibt, wird die Vermehrung der bakteriellen Flora unterdrückt und die Entstehung von Reizungen, Allergien oder Dermatitis verhindert.

Microlon® è una microfibrilla di poliammide tinta in pasta particolarmente apprezzata dai consumatori per le sue eccezionali caratteristiche: super soft al tatto, alta sensazione di comfort una volta indossata, resistente e facile da lavare. Poiché è tinta in pasta non subisce stress termici e mantiene inalterate le caratteristiche principali della microfibrilla.

Microlon® is a microfibre made from dope dyed nylon particularly appreciated by the consumer for its exceptional characteristics: super soft to the touch, high comfort, resistance and easy care. Because it is dope dyed, Microlon® does not undergo the thermal stress and therefore maintains intact in the fabric its important microfibre characteristics.

Microlon® ist eine Polyamid-Mikrofaser, durchgefärbt, die vom Benutzer wegen ihrer außerordentlichen Eigenschaften geschätzt wird: superweich im Griff, am Körper ungemein angenehmes Komfortgefühl, strapazierfähig und leicht zu reinigen. Da das Material durchgefärbt ist, werden auch durch Wärmeschocks die wichtigsten Eigenschaften von Mikrofasern nicht beeinträchtigt.

Q-SKIN® è una fibra tecnica batteriostatica, in grado, grazie agli ioni di argento, di mantenere inalterato l'equilibrio naturale della pelle, indipendentemente dal livello di attività fisica che si sta effettuando. Grazie alla presenza dell'agente batteriostatico all'interno della matrice polimerica (e non depositato sulla superficie) non vi è nessuna migrazione dal tessuto alla pelle, prevenendo in questo modo qualsiasi forma di allergia. Le proprietà antibatteriche del filato impediscono la formazione di cattivi odori.

Q-SKIN® is a bacteriostatic technical fibre with silver ions which maintain the skin's natural balance irrespective of the level of physical activity practised. The bacteriostatic agent is in the polymeric matrix (not coated on the surface) therefore it does not migrate from the fabric to the skin and will not cause allergies. The yarn's antibacterial properties inhibit the formation of bad odours.

Q-SKIN® ist eine bakteriostatische Faser, die dank eingeschlossener Silberionen das natürliche Gleichgewicht der Haut auch bei intensiver körperlicher Tätigkeit nicht verändert. Da der bakteriostatische Wirkstoff im Kunststoff eingeschlossen ist (nicht als Beschichtung auf der Oberfläche) kommt es zu keiner Migration vom Material zur Haut. Jede Allergie ist daher ausgeschlossen. Die antibakterielle Eigenschaft der Faser verhindert unangenehme Geruchsbildung.

Il filato Softair Plus è progettato per i mercati più esigenti. Grazie alla sua costruzione elastica di multifilamento, offre una buona morbidezza, con una sensazione naturale sul corpo, una straordinaria traspirabilità e un ottimo controllo termico.

Softair Plus yarn is designed for the most demanding markets. Due to its elastic construction of multifilament, it offers good touch, with a natural feel to the body, extraordinary breathability and thermal control.

Softair Plus Garn ist für die anspruchsvollsten Märkte konzipiert. Dank seiner elastischen Konstruktion aus Multifilamenten bietet es einen guten Griff, ein natürliches Gefühl am Körper, außergewöhnliche Atmungsaktivität und Wärmeregulierung.

La viscosa di bambù è un tessuto derivato dalle fibre della pianta di bambù, filato e pettinato fino alla produzione del filo. Il tessuto di viscosa di bambù si distingue dagli altri tessuti per la sua sostenibilità e per la maggior durata. È un tessuto versatile con molti vantaggi, tra cui un'eccellente traspirabilità, proprietà di assorbimento dell'umidità, resistenza, è termoisolante, assorbente, lucente e morbido.

Bamboo viscose is a fabric made from the fibres of the bamboo plant, which is spun and combed into yarn. Bamboo viscose fabric differs from other fabrics in that it is sustainable and more durable. It is a versatile fabric with many advantages, including excellent breathability, moisture wicking properties, durability, it is heat insulating, absorbent, lustrous and soft.

Bambusviskose ist ein Stoff, der aus den Fasern der Bambuspflanze hergestellt wird, die zu Garn gesponnen und gekämmt werden. Bambus-Viskose-Gewebe unterscheiden sich von anderen Stoffen dadurch, dass sie nachhaltig und haltbarer sind. Es ist ein vielseitiger Stoff mit vielen Vorteilen, darunter hervorragende Atmungsaktivität, feuchtigkeitsableitende Eigenschaften, Strapazierfähigkeit, wärmeisolierend, saugfähig, glänzend und weich.

I filati di cotone, dotati di ottime proprietà igroscopiche e resistenza al calore, abbinati ad altre fibre come in questo caso al nylon garantiscono un buon comfort.

The cotton yarns, with excellent hygroscopic and heat-resistant properties, combined with other fibres such as nylon in this case, guarantee good comfort.

Baumwollgarne, die über hervorragende hygroscopische Eigenschaften und Hitzebeständigkeit verfügen, garantieren in Kombination mit anderen Fasern, wie in diesem Fall Nylon, einen hohen Tragekomfort.

SUNGLASSES CATEGORY LENS

CATEGORY	USE	% LIGHT TRANSMITTED THROUGH THE LENSES	DESCRIPTION		
0		80% - 100%	Riduzione molto limitata dell'abbagliamento	Very limited reduction of sunglare	Sehr begrenzte Reduzierung der Sonnenblendung
1		43% - 80%	Protezione limitata contro l'abbagliamento	Limited protection against sunglare	Begrenzter Schutz gegen Sonnenblendung
2		18% - 43%	Buona protezione contro l'abbagliamento	Good protection against sunglare	Guter Schutz gegen Sonnenblendung
3		8% - 18%	Protezione elevata contro l'abbagliamento	High protection against sunglare	Hoher Schutz gegen Sonnenblendung
4		3% - 8%	Protezione molto elevata contro i raggi solari estremi, ad esempio in montagna o nel deserto	Very high protection against extreme sunglare, e.g. at mountains or in desert	Sehr hoher Schutz gegen extreme Sonnenblendung, z.B. im Gebirge oder in der Wüste

GOGGLES FEATURES

Anti fog dual lens	Flexible TPU frame	Comfort frame	Venting lens and frame
Anti-scratch	Helmet Compatible	Anti-skid straps	Spherical lens
UV protection	Mirror lens		

SUNGLASSES FEATURES

**DuPont™
Bexloy®**

Bexloy è una gomma prodotta da Dupont composta da diversi sistemi polimerici generici basata sul nylon amorfo. Dona flessibilità ad un peso meno elevato della gomma ed è facile da lavorare.

Bexloy is a Dupont-produced rubber consisting of several amorphous nylon-based generic polymer systems. It provides flexibility at a lower weight than rubber and is easy to work with.

Bexloy ist ein von Dupont hergestellter Gummi, der aus mehreren allgemeinen Polymersystemen auf der Grundlage von amorphem Nylon besteht. Er bietet Flexibilität, ist gleichzeitig leichter als gewöhnlicher Gummi und lässt sich leicht verarbeiten.

Adjustable Nose Piece	Anti Scratch Lens	Mirror Lens	UV Protection Lens
Spherical Lens	Total Comfort Fit
