## OUTDOOR

ULU FALL WINTER 2025  
**EYAK** XL Extralight

uluoutdoor.com

## Specialized For Snowy Condition

The Eyak features a hull-shaped midsole tailored for 3-5 inches of snow, offering an expansive snow contact area for enhanced lateral support. Meanwhile, the Xtreme Light boasts a patented EVA foam sole that retains its elasticity even at -30 degrees Fahrenheit. Its X-deepened anti-slip grooves ensure a comfortable walking experience in low-temperature snow conditions.

## Extra Light And Supportive Midsole

The EYAK series features XL EXTRALIGHT® that is three times lighter than generic EVA and other materials with the same mechanical and physical properties. XL EXTRALIGHT® is a closed-cell foam material so it does not absorb substances, external agents and it is resistant to the effect of chemical agents (like acid/alkaline). It is resistant to atmospheric agents, especially at low temperatures.

## Weather Protection Upper

The upper of EYAK features adjustable waterproof material combined with 3M Thinsulate INSULATION (Eyak Mid) and nubuck leather (Eyak Low), offering a warm, cozy and breathable feel while fully protecting against winter weather conditions.

**Materials**

- Outer-Upper: 50D double-line grid mechanical stretch water proof cover
- Inner-Upper: Suede
- Insole: Mesh insole (mildew-proof and antibacterial) with fleece-lined interior for a warm and cozy feel
- Outsole: XL Extralight outsole for lightweight and traction in snowy condition. Designed with ultra-deep tread pattern for compatibility with trail crampons.

**Description**

- Meet EYAK Show Low, the casual winter sneaker that combines everyday comfort with exceptional performance. Designed as the relaxed version of EYAK Boot, the EYAK sneaker is perfect for daily wear in cold conditions. The unique hull-shaped outsole offers a larger contact surface on snow, ensuring optimal stability and grip. The upper is made from water-repellent Nubuck Plus, the super-imposed fully waterproof outer layer, providing double protection against winter elements. The integrated drawstring design allows easy adjustment for perfect fit without taking off your gloves.
