

 **LAKEN**
Goes with you *since 1912*

HISTORY

1912 The beginning

LAKEN is a young 111-years-old company that began its activity as a pioneer in the transformation of aluminum.

It has been the production of recipients made of this versatile and resistant metal what has allowed the company to grow exponentially in the decades following its founding. Growth that has turned Laken into the large, modern factory, with 10,000 square meters of cutting edge installations situated in one of the major European industrial areas that it is today.

HISTORY

**1960
1970**

Specialization and international expansion

Until the sixties, our products were sold only in Spain in household and hardware stores.

It was at the end of the sixties when the company decided to focus in the sporting goods market. A few years later, in the early seventies, we started to export our products.

Nowadays, Laken is consolidated across the five continents, with a network of agents, distributors and sales points that make our company a solid international reference. LAKEN exports over 80% of its total turnover.

HISTORY

2007 Laken Junior

In 2007, the children's line we had been working on for a while develops its own personality and brand: is the birth of Laken Junior.

2010 Constant innovation ERP

LAKEN's constant improvements lead us to set an ERP system in order to manage the complete organization of the company: production, purchasing, sales...

Over time, we have also earned various certifications:

HISTORY

A decorative graphic on the left side of the slide shows a perspective view of many blue and green gas cylinders arranged in rows, receding into the distance. The cylinders are partially obscured by large, overlapping yellow and grey geometric shapes.

2011

Mastery supplies of Oxyane Group

6 years of hard work collaborating with the largest European sporting goods group finished with: Mastery supplier of Oxyane Group.

2012

Improvement and optimization

One year later, Laken & Oxyane implemented an Effimax System and Lean Manufacturing.

HISTORY

2012 New products: 2014 stainless steel and Tritan

First, we introduced stainless steel bottles extending our offer of reusable metal water bottles.

And then, with the incorporation of the Tritan line to its catalogue, Laken became the company offering the widest range of reusable bottles in the world.

2018 New section, new products

The opening of a new polishing section, allowed us to supply stainless steel cooking sets for QUECHUA.

HISTORY

A decorative graphic on the left side of the page. It features a large, dark grey mountain shape composed of many overlapping circular metal discs. To the left of this mountain are two solid-colored triangles: a large yellow one in the foreground and a smaller grey one behind it.

2021

Aluminium PCR

This year we started using PCR (Post Consumer Recycled) aluminium in all our aluminium bottles, making us one of the few manufacturers in the world to use this sustainable material.

2023

Stainless steel production line

Finally, this year we started the installation of our own steel bottle production line, which will be operational by the end of the year. This new production line makes us the only manufacturer outside China with the capacity to produce steel, aluminium and Tritan bottles.

PHILOSOPHY

Reusable bottles (and other containers) are what we do

Our mission is offering
the best possible solution
for water, food and other
beverages conservation
and transportation for
everybody all around
the world.

PHILOSOPHY

We manufacture reusable bottles with the fundamental objective of offering solutions of hydration and feeding to everybody, keeping always in mind other objectives, equally important, we must reach.

Take care of people

Of our customers, to whom we offer the best and safest products.
Of our suppliers, staff, and anyone else involved with our activity.

Take care of the environment

All over the world, water bottles are in the spotlight. Not only do we offer a product that is eco-friendly by itself, but we also manufacture it in scrupulous compliance with all national and international standards and regulations regarding our activity and the environment.

Take care of each process

From the raw materials to the final product, going through each procedure, the exhaustive care of each detail is what guarantees the development of a quality product, designed to meet both its operational needs as well as customers' design and aesthetics requirements.

CORE BUSINESS

Only if it is manufactured to the highest quality standards can a reusable bottle or container perform its main functions satisfactorily: preserve its content properly and be able to be used again and again over the years.

All our products are BPA, phthalates, lead or other harmful substances free.

Aluminium classic canteens

Light, resistant and with that lifelong classic look, indispensable for any trip to the mountain.

Aluminium PCR bottles

Light, resistant, totally safe for adults and kids and with a great variety of sizes, colors and caps. And now, made from recycled aluminium!

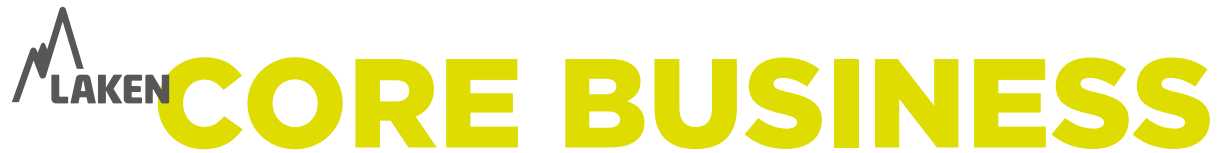

Tritan bottles

Reusable and sustainable high quality plastic that offers lightness, strength and durability at a very affordable price.

Stainless steel thermo bottles

With a double wall of 18/8 stainless steel, keep hot drinks up to 8 hours and cold drinks up to 12 hours.

Customization

Basic Steel

Summit cap

Cooking sets

A row of ten aluminum water bottles with various colorful designs. From left to right: 1. A bottle with a dense, multi-colored geometric pattern. 2. A white bottle with a blue and yellow abstract design featuring a bird-like shape. 3. A silver bottle with a colorful, stylized tree design. 4. A white bottle with a blue and white geometric pattern. 5. A white bottle with a colorful, stylized cityscape design. 6. A white bottle with a blue and white geometric pattern. 7. A white bottle with a colorful, stylized landscape design featuring trees and a sun. 8. An orange bottle with a black and white beaver design. 9. A silver bottle with a black and white beaver design. 10. A silver bottle with a black and white beaver design.
