THE MATERIAL

In the structure of the materials, it has been decided to use POM (Polyoxymethylene).

The POM, is a high resistance plastic, gives us a high rigidity of the piece and an excellent dimensional stability. We take advantage of its technical and physical characteristics, to be a material with high resistance to low temperatures, from $-40\text{ }^{\circ}\text{C}$, an essential condition for the good mechanical functioning of the clipping system of the two parts of the article, base and cover.

The product must maintain its functionality and usability under extreme conditions. This functionality is an indispensable requirement because the user of the product will use it in severe climatic conditions, being functional even with the use of protective gloves.

On the other hand, it will be reinforced with a 3% Carbon additive because this is how we endow the product with a very special technical characteristic by providing it with UV protection at high temperatures.

//

USED IN SKI FIXATION OR EXTERNAL PARTS OF THE CAR, THE POM IS A MATERIAL WHICH IS RESISTANT, LIGHT AND DURABLE TO HIGH AND LOW TEMPERATURES.

HARD & LIGHT

REUSABLE EXPERIENCE

//

WITH THESE TECHNICAL CHARACTERISTICS, OUR BET IS TO ENDOW THE PRODUCT WITH FUNCTIONALITY AND USABILITY IN THE MOST SEVERE CONDITIONS OF HIGH AND LOW TEMPERATURES, AT THE SAME TIME THAT WE BUILD A DESIGN DESIGNED FOR LONG-LASTING RE-USE OF THE PRODUCT DUE TO ITS STRONG RESISTANCE AND STABILITY OF THE TECHNICAL

CAPSULE

CAPSULE

BUNKERS REFILL

A Capsule which is 100% recyclable with no metal elements which should be separated to be recycle made from Polypropylene.

Because polypropylene material is so adaptable, PP can be recycled into many different types of products, including fibers for clothing, industrial materials, kitchenware and more.

MECHANISM

//

- ♻️ IT TAKES FEWER NATURAL RESOURCES TO PRODUCE AND USES LESS ENERGY THAN CREATING PAPER, COTTON, CANVAS AND JUTE BAGS.
- ♻️ IT GENERATES FEWER WASTE PRODUCTS IN PRODUCTION AND DISPOSAL.
- ♻️ IT IS WIDELY RECYCLED.
- ♻️ IT HAS A LOW CARBON FOOTPRINT AND TRANSMITS THE LOWEST CARBON DIOXIDE EMISSIONS COMPARED TO OTHER PLASTICS.
- ♻️ WHEN BURNED, IT DOES NOT GENERATE TOXIC GASES, LIKE CHLORINE FROM PVC PLASTICS.

CARABINER GATE

This strong stainless steel carabiner gate has been treated with Nerinox, a controlled chemical oxidation process of the stainless steel surface. With this oxidation process, we obtain a surface with an intense black color and noticeable uniformity.

To develop this Gate we have been testing different possibilities, techniques and Materials with the main Interest of having a strong, durable and useful carabiner Gate, that can be used in the most extreme conditions without affecting the Quality of the product.

We've decided to use a stainless steel gate in order to avoid the oxidation of the material in the contact of Sea Water.

//

THE NERINOX PROCESS DOES NOT ALTER THE QUALITIES OF THE STAINLESS STEEL ITSELF. WITH NERINOX YOU GET A BLACK FINISH, WHICH MAKES IT REALLY DISTINCTIVE, ELEGANT AND MODERN.

FORMULA

FORMULA

MADE IN BARCELONA

Our formula produced in Barcelona has been developed having in mind special features to be used in the Outdoors and in extreme conditions:

- Extreme Protection SPF50+.
- It is waterfree so it takes longer to melt or freeze.
- The fact of not having water helps to not increase the sweat when doing spor, as it Will happen with another product formulated with water.
- It is developed to be use for Face and Lips.
- Gluten Free. Cruelty Free. Paraben Free. Water Free.
- Tested in different expeditions: Himalayan Mountains, Crossing the Atlantic...

//

INCI: ISONONYL ISONONANOATE , POLYETHYLENE , RICINUS COMMUNIS SEED OIL , ETHYLHEXYL METHOXYCINNAMATE , DIETHYLAMINO HYDROXYBENZOYL HEXYL BENZOATE , ALUMINUM STARCH OCTENYLSUCCINATE , DIBUTYL ADIPATE , ETHYLHEXYL TRIAZONE , BIS-ETHYLHEXYLOXYPHENOL METHOXYPHENYL TRIAZINE , ZINC OXIDE , HYDROGENATED CASTOR OIL , ARGANIA SPINOSA KERNEL OIL , TITANIUM DIOXIDE , COPERNICIA CERIFERA CERA , CERA ALBA , TOCOPHEROL, BETA-SITOSTEROL, SQUALENE , BHT , SALVIA SCLAREA OIL, AROMA.

CONCLUSIÓN

El Patch test permite concluir que el producto:

FOTOPROTECTOR STICK SPF50+ (P/1973B31 LOTE 190618)

usado por sujetos sin alergia a ninguno de sus componentes, es bien tolerado por la piel ya que no se documentaron irritaciones o reacciones alérgicas en los voluntarios.

A partir de los resultados obtenidos con la metodología adoptada, dicho producto cumple las exigencias del test de compatibilidad cutánea, y puede ser clasificado como:

NO IRRITANTE

con una

MUY BUENA COMPATIBILIDAD CUTÁNEA

A man in winter gear, including a black beanie, blue sunglasses, and a dark jacket, is shown in profile against a snowy mountain background. He has a large backpack on his back. The text 'OWNED PROPERTY' is overlaid in large white letters, and 'PROUDLY PRODUCED IN BARCELONA AND WITH OUR OWN MOLDS' is overlaid in smaller white letters below it. TÍTULO DE MODELO DE UTILIDAD

Cumplidos los requisitos previstos en la vigente Ley 24/2015, de 24 de julio, de Patentes, se expide el presente TÍTULO, acreditativo de la concesión del Modelo de Utilidad.

Se otorga al titular un derecho de exclusiva en todo el territorio nacional, bajo las condiciones y con las limitaciones en la Ley de Patentes. La duración del modelo de utilidad será de diez años contados a partir de la fecha de presentación de la solicitud (13/11/2020).

El modelo de utilidad se concede sin perjuicio de tercero y sin garantía del Estado en cuanto a la validez y a la utilidad del objeto sobre el que recae.

Para mantener en vigor el modelo de utilidad concedido, deberán abonarse las tasas anuales establecidas, a partir de la tercera anualidad. Asimismo, deberá explotarse el objeto de la invención, bien por su titular o por medio de persona autorizada de acuerdo con el sistema de licencias previsto legalmente, dentro del plazo de cuatro años a partir de la fecha de presentación de la solicitud del modelo de utilidad, o de tres años desde la publicación de la concesión en el Boletín Oficial de la Propiedad Industrial, aplicándose el plazo que expire más tarde.
