Materials: Merino Wool 54%, Polyamide 33%, Acrylic 11%, Lycra 2%.

ULTRA WARM

SMART ELASTIC TECHNOLOGY®

S.E.T.®

HEAT CONDUCTION SYSTEM

Being connected to the S.E.T.®, the heat conduction system efficient spreads warm air to a wider surface area. The 3-dimensional structure is in direct contact to the skin in order to guarantee maximum heating power.

BUFFER CONES

Improved heat retention while reducing material: thanks to smart, 3-dimensional knitting technology, this is not a contradiction in terms. The Buffer Cone Chambers form fine interstices in which air, heated by the body, can be stored and serve as a cold buffer.

MOISTURE-VENT TECHNOLOGY

A new level of breathability: the Moisture-Vent Zone is a high-tech material zone that absorbs moisture from the skin and transports it to the outside.

- Keeps the skin pleasantly dry
- Reduces skin irritation
- Protects the body from cooling down during breaks
- Increases wearing comfort

SMART ELASTIC TECHNOLOGY®

ULTRA WARM COMFORT SOCKS S.E.T.®

HEATED SKI SOCKS FOR GREATER WARMTH AND COMFORT

Breathable and heated socks that spread a subtle warmth around the toes due to the ultra-thin S.E.T.® heating line.
