OUR HISTORY

1987

Kicker Sports was founded in 1987 by Mr. Jahangir Iqbal, a BBA (Bachelor of Business Administration) who had worked for many years in the football manufacturing industry with the experience of 20 years before Establishing Kicker Sports.

Its journey of around half a century, and 3 generations, that was initially started by Kicker Sports with 25 personnel at a period when the market was highly competitive. Mr. Jahangir Iqbal first began generating 1000 balls every month. As time went on, Kicker Sports improved its relationships with the global market and won the trust of its clients. During this time, Kicker Sports employed over 1,000 people.

Kicker is pioneer for introducing PU instead leather in football industry, under supervision of Mr. Jahangir Iqbal developed football with PU material very first time in the World and gave a new trend to this industry.

1990

Soon after, Kicker Sports, using a cutting edge 62 panel ball created by Jahangir Iqbal, gained the confidence of Global Brands, over the world. This was additionally shown on LA LIGA (Spanish League) in the early 1990s.

1998

A few years after in 1998, Kicker Sports introduced its new range of goalkeeper gloves and began with a monthly manufacturing of 10,000 pairs that is now reached around 90,000 pairs a month.

2004

Kicker Sports created a 100% latex embossing process for goalkeeper gloves in 2004 and quickly established itself as Pakistan's top manufacturer of professional gloves.

2007

In 2007, Kicker Sports reached another technical milestone. Within a year, Kicker Sports had successfully developed the Punch Tech entry level goalie glove with his 5mm high end embossing on his 2D corners of the glove. This gives a goalkeeper 30% more confidence in him by observing the impact of the ball.

2009

Gradually, Kicker mechanized footballs (hand sewn) and goalkeeper gloves, and in 2009, Kicker Sports increased its production capacity to 100,000 balls per month.

In 2009 Kicker sports Reached another Milestone by introducing the Thermo bonded Technology football at the time when companies over the world were struggling to produce this technology ball Kicker sports was the first company in Pakistan to have installed the full setup of Thermo bonded ball machinery. At first the capacity was 10,000 balls per Month As time went on, Kicker Sports improved its relationships with the global market and won the trust of its clients now Kicker sports have the capacity to produce FIFA Quality Pro Level ball per Month up to 30,000 balls per month. At the Moment in Worlds top Leagues Kicker Sports Manufactured thermo bonded Ball is being played Which shows the trust and Quality Standards Kicker sports is working

2016

Kicker Sports being the leading Manufacturing company in 2016 made the Revolutionary New development which changed the Goalkeeper industry for ever by introducing first ever Long Body Sublimated Goalkeeper gloves with EVO ZONE.

2017

In 2017 Kicker Sports Launched its new Range of Product Apparel Manufacturing and Began with the production Capacity of 20,000 pcs a Month which has now reached to 75,000 pcs a Month. Producing one of the finest and technical Garments in Industry.

2019

First ever recycled knitted goalkeeper gloves developed and introduced with polyester yarn made of used plastic bottles.

2021

Kicker Sports Mega factory building structure started over then 300,000 Square Feet.

2022

With our environment commitment we are able to start production for our Goalkeeper Gloves in different Component.

WOMEN EMPOWERMENT

We at Kicker made a commitment to advancing gender equality and placing women in senior and leading roles. We recognize that having access to financial services and items that improve quality of life helps not just the women who use them but also their families and communities as a whole.

We think that giving women the opportunity to work will help them become valuable members of society and organizations in addition to helping them meet their financial needs with Safe working environment which allows them to perform to the best of their abilities.

In light of the aforementioned information, Kicker not only provided employment possibilities for women but also took the effort to provide training-level workspace in order to develop their skills and knowledge. We gave unskilled females complete training, and throughout the training period, we supported and motivated them with all of our moral, technical, and financial support. By paying them full Salary during trainings, we encouraged them to demonstrate that they could be a strong and productive limb not only for family but also for the nation and society.
