

100%  
MADE IN ITALY

## Professional Training

*Free play Table soccer with professional characteristics for indoor use*

A specially designed table soccer with almost same material and colors as the Competition table (official FICB Competition table (Italian Table Soccer Federation)). Train yourself on a professional table and have your house decorated with an attractive and modern piece.

- Single block body made of poplar multilayer wood covered with laminated plastic sheets to obtain an extremely solid and heavy material to absorb the toughest match moves when used by professional players and which guarantees the precision of the ball path when performing side shots.
- Telescopic rods, diam. 18 mm, made of temperate steel, with high carbon content which increases the resistance of 20%, treated with double chrome plating to prevent rust formation.
- Rubber latex professional handles that allow a good grip and reduce hand sweating
- Goal slits are situated at the two sides for the ball recovery
- Satinized anti-glare glass playfield that allows a good control over the ball.
- An extruded anodized aluminum top, painted in white color, that forms a barrier to protect the tables body for water infiltrations preserving it from humidity and sunlight.
- Aluminum legs 80x80, painted with epoxy powder with adjustable feet
- New stamped bushing made of high resistant plastic material with a new concept self-lubricating slid insert that allows an exceptional game speed affording minimum efforts.
- Supplied with 10 balls and 1 lubricant spray for rods.
