

JASAN TEXTILE AND DYEING (VIET NAM) CO.,LTD

“Seamless Innovation in Intimates &
Activewear”

Seamless technology eliminates stitches, /minimal Seams or bulky Stitching reducing irritation and enhancing comfort.

Its Plating Knit Technology- provide unique stretchability to the fabric Its unique knit patterns, not only adds visual aesthetics however are functional – 3D stretches.

Technology helps controlling different levels of stretchability (like support/ compression/ shaping zones) and breathability (mesh zones) ergonomically placed through body mapping.

Performance properties like wicking, warmth, cooling, Antibacterial, breathability, UV repellency can be engineered by selection and combination of yarns, knitting pattern and fabric treatment.

Seamless Apparel technology originated in Italy in the late 20th Century. The technology evolved from circular knitting machines used for hosiery and socks.

By 1990s gained traction for producing innerwear due to its comfort (no seams, elastic bands).

By 2025, The seamless apparel industry is experiencing robust growth, expanded to intimate UW, Bras, activewear, shapewear, and loungewear.

What is Seamless

Jasan Holding Group Co., Ltd., “Innovating Comfort Since 1995”.

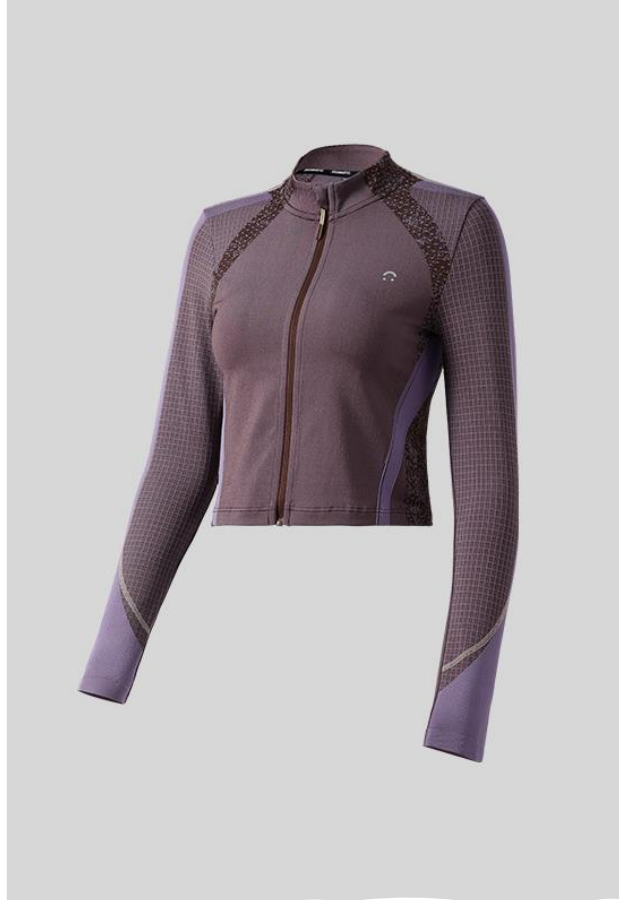

About Us
